EMPLOYMENT, EARNINGS AND HOURS

EMPLOI, GAINS ET DURÉE DU TRAVAIL

JULY - 1978 - JUILLET

Owing to an adjustment of the Employment, Payrolls and Manhours survey coverage, the employment, earnings and hours statistics have been revised for the months of January to June 1978 inclusively. This publication contains revised estimates for May and June 1978; data for January to April 1978 are contained in *Employment, Earnings and Hours, January - April 1978* (Catalogue 72-517). These data supersede previously published data.

Dû à la modification du champ d'observation de l'enquête sur l'emploi, la rémunération et les heures-hommes, les statistiques sur l'emploi, les gains et la durée du travail ont été révisées pour les mois de janvier à juin 1978 inclusivement. La présente publication contient les estimations révisées pour mai et juin 1978; les données pour janvier à avril 1978 figurent dans *Emploi, gains et durée du travail, janvier - avril 1978* (nº 72-517 au catalogue). Ces données viennent remplacer celles qui ont été publiées précédemment.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

– nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

– néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indic contraire) les colonnes laissées en blanc dans le cas des employés e ouvriers indiqués séparément, signifient que les données relative ouvriers pour lesquels les heures sont enregistrées ne sont disponibles.

COMMENTARY

First estimates(1) – July 1978 (Seasonally Adjusted)

The first estimates of the Canada industrial composite(2) of employment (1961 = 100) for July 1978 showed a 0.1% ease from June. Manufacturing and mining (including milling) rted increases while the remaining industry divisions recorded s. Gains were posted in Ontario and British Columbia and losses recorded in Quebec, in the Atlantic and Prairie regions.

Average weekly earnings rose by 0.2% at the industrial posite level in July. Gains were recorded in forestry and construc- while manufacturing remained unchanged and the remaining stry divisions registered losses. The Atlantic region and British mbia posted gains and the remaining regions declined.

Preliminary Data – June 1978

loyment

Seasonally adjusted, preliminary data for June increased by at the Canada industrial composite index of employment. All stry divisions posted gains except manufacturing which remained anged, and forestry and service which declined. All regions tered gains except the Prairie region which remained unchanged Ontario which decreased.

ings and Hours

Seasonally adjusted, average weekly earnings rose by 0.9% at national industrial composite level. All industry divisions, partici- d in the increase, except construction, which declined. All regions ed gains.

Unadjusted, average weekly earnings increased by 1.5% to .44 at the Canadian industrial composite level. Average hourly ings increased by 12 cents in mining (including milling) to $8.65, our cents in manufacturing to $6.82 and remained unchanged in truction at $10.10. Average weekly hours were up in mining uding milling), in manufacturing and in construction.

(1) See note on Statistical Presentation under Concepts and Methods at the back of this publication.
(2) Industrial Composite is the sum for all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – juillet 1978 (Chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries du Canada montrent un recul de 0.1% de juin à juillet. Les manufactures et les mines (y compris le broyage) ont enregistrés des gains, alors que les autres divisions de l'activité économique ont accusé des pertes. L'Ontario et la Colombie Britannique ont connu des hausses, mais le Québec et les régions de l'Atlantique et des Prairies ont affiché des baisses.

Les gains hebdomadaires moyens au niveau de l'ensemble des industries du Canada ont augmenté de 0.2% de juin à juillet. On a observé des hausses dans le forestage et la construction, alors que les manufactures demeuraient inchangées et que les autres divisions de l'activité économique connaissaient des pertes. La région de l'Atlantique et la Colombie Britannique ont accusé des gains et les autres régions ont régressé.

Données provisoires – juin 1978

Emploi

Après désaisonnalisation, les données provisoires pour juin 1978 révèlent une augmentation de 0.2% au niveau de l'ensemble des industries du Canada. Exception faite des manufactures, qui sont demeurées inchangées, du forestage et des services, qui ont enregistré des baisses, toutes les divisions de l'activité économique ont connu des hausses. On a observé des gains dans toutes les régions à l'exception de la région des Prairies, qui est demeurée inchangée, et de l'Ontario, qui a diminué.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, se sont accrus de 0.9% au niveau de l'ensemble des industries du Canada. Toutes les divisions de l'activité économique ont participé à la hausse générale exception faite de la construction, qui a régressé. Toutes les régions ont enregistré une augmentation.

Les gains hebdomadaires moyens, non désaisonnalisés, ont affiché une hausse de 1.5% pour atteindre $267.44 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens se sont accrus de douze cents dans les mines (y compris le broyage) ($8.65) et de quatre cents dans les manufactures ($6.82), mais sont demeurés inchangés dans la construction ($10.10). Le nombre moyen d'heures hebdomadaires travaillées s'est élevé dans les mines (y compris le broyage), les manufactures et la construction.

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

. First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

e: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les donnees de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLE 18. Average Hourly Earnings of Hourly-rated Wage-earners, Seasonally-adjusted and Unadjusted, Selected Series for Canada

TABLEAU 18. Rémunération horaire moyenne désaisonnalisée et non désaisonnalisée des ouvriers (heures déclarées), certaines séries, Canada

Year – Année	J	F	M	A	M	J	J	A	S	O	N	D	Average – Moyenne
Manufacturing - Manufactures:													
adjusted - désaisonnalisé													
1975	4.76	4.83	4.90	4.94	4.99	5.04	5.08	5.12	5.16	5.23	5.29	5.35	
1976	5.42	5.51	5.57	5.63	5.70	5.76	5.80	5.85	5.89	5.91	6.00	6.04	
1977	6.11	6.17	6.20	6.25	6.33	6.35	6.41	6.45	6.54	6.54	6.59	6.63	
1978	6.62	6.66	6.70	6.70	6.74								
unadjusted - non désaisonnalisé													
1975	4.77	4.83	4.91	4.96	5.01	5.07	5.07	5.07	5.14	5.24	5.28	5.34	5.06
1976	5.42	5.51	5.58	5.65	5.73	5.80	5.79	5.80	5.87	5.92	5.98	6.02	5.76
1977	6.11	6.17	6.21	6.27	6.36	6.39	6.40	6.39	6.52	6.55	6.57	6.60	6.38
1978	6.62	6.66	6.72	6.72	6.78								
Durable goods - Biens durables:													
adjusted - désaisonnalisé													
1975	5.06	5.14	5.21	5.26	5.32	5.38	5.44	5.49	5.53	5.61	5.68	5.75	
1976	5.83	5.90	5.95	6.01	6.07	6.13	6.16	6.22	6.23	6.27	6.37	6.42	
1977	6.50	6.57	6.61	6.68	6.74	6.75	6.82	6.86	6.96	6.99	7.04	7.07	
1978	7.03	7.09	7.15	7.14	7.20								
unadjusted - non désaisonnalisé													
1975	5.07	5.14	5.21	5.27	5.33	5.40	5.42	5.46	5.55	5.64	5.68	5.71	5.41
1976	5.83	5.90	5.94	6.02	6.08	6.16	6.14	6.18	6.25	6.30	6.37	6.37	6.13
1977	6.50	6.57	6.60	6.69	6.76	6.78	6.80	6.82	6.98	7.02	7.03	7.01	6.80
1978	7.03	7.10	7.14	7.16	7.22								
Non-durable goods - Biens non durables:													
adjusted - désaisonnalisé													
1975	4.45	4.51	4.56	4.59	4.62	4.66	4.69	4.73	4.75	4.80	4.86	4.91	
1976	4.95	5.10	5.16	5.24	5.30	5.37	5.42	5.46	5.54	5.55	5.60	5.64	
1977	5.70	5.74	5.77	5.80	5.87	5.92	5.97	6.01	6.09	6.09	6.13	6.17	
1978	6.18	6.20	6.22	6.21	6.24								
unadjusted - non désaisonnalisé													
1975	4.46	4.50	4.58	4.61	4.66	4.71	4.70	4.68	4.70	4.78	4.83	4.91	4.68
1976	4.95	5.09	5.19	5.26	5.35	5.43	5.44	5.40	5.48	5.52	5.56	5.63	5.36
1977	5.70	5.73	5.80	5.83	5.93	5.99	5.99	5.95	6.03	6.05	6.08	6.15	5.94
1978	6.18	6.19	6.26	6.24	6.30								
Food and beverages - Aliments et boissons:													
unadjusted - non désaisonnalisé													
1975	4.49	4.57	4.69	4.71	4.70	4.74	4.79	4.73	4.81	4.94	5.02	5.13	4.78
1976	5.15	5.22	5.37	5.41	5.38	5.42	5.43	5.34	5.42	5.59	5.65	5.76	5.43
1977	5.85	5.83	5.97	5.90	5.91	5.92	5.90	5.81	5.90	5.99	6.08	6.23	5.94
1978	6.24	6.25	6.36	6.28	6.22								
Tobacco processing and products - Traitement et produits du tabac:													
unadjusted - non désaisonnalisé													
1975	5.41	5.44	5.39	5.58	5.82	6.06	6.09	6.22	6.53	6.55	6.13	6.10	5.94
1976	6.06	6.08	6.22	6.32	6.57	6.86	6.99	7.05	7.21	7.35	6.74	6.80	6.69
1977	6.93	6.99	7.26	7.55	7.63	7.67	7.77	8.00	8.09	7.91	7.39	7.55	7.56
1978	7.50	7.50	7.54	7.80	8.22								
Rubber products - Produits de caoutchouc:													
unadjusted - non désaisonnalisé													
1975	4.79	4.85	4.95	4.93	4.95	5.00	5.08	5.13	5.19	5.29	5.32	5.37	5.07
1976	5.40	5.49	5.56	5.54	5.62	5.63	5.64	5.68	5.77	5.77	5.84	5.82	5.64
1977	5.97	5.92	5.97	6.01	6.00	6.02	6.16	6.15	6.22	6.23	6.27	6.36	6.11
1978	6.41	6.46	6.42	6.43	6.52								
Leather products - Produits du cuir:													
unadjusted - non désaisonnalisé													
1975	3.22	3.25	3.32	3.37	3.45	3.51	3.47	3.47	3.54	3.57	3.63	3.68	3.46
1976	3.71	3.77	3.78	3.87	3.96	3.98	3.93	3.90	3.98	4.05	4.07	4.16	3.93
1977	4.09	4.11	4.18	4.23	4.30	4.36	4.30	4.26	4.31	4.35	4.38	4.39	4.27
1978	4.47	4.45	4.49	4.50	4.61

)RICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)

)ased on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly vages and salaries).
3. Average weekly hours and average hourly earnings of hourly-ated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (availa-le only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-arners (available on request basis only for periods prior to 971).

1960

Monthly data were not published but are available on

Annual averages are shown in:

eview of Employment and Average Weekly Wages and ilaries, *Catalogue 72-201, 1957-67;* Review of Man Hours id Hourly Earnings, *Catalogue 72-202, 1957-67.*

1970

mployment Indexes, 1961-1964, for Canada and Ontario, for , bridges and streets; engineering; construction; highway ge maintenance; transportation; and transportation, commu-nd other utilities. Employment, Earnings and Hours, *Cata-002, October 1971.*

mployment Indexes, 1965-1967, for Canada and Ontario, for , bridges and streets; engineering; construction; highway ge maintenance; transportation; and transportation, commu-nd other utilities. *Catalogue 72-002, February 1968.*

verage Weekly Earnings, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Sotia: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

verage Weekly Earnings, 1968-1970, for Canada, Ontario nto, for scientific and professional equipment; miscellaneous uring industries; non-durable goods; manufacturing; whole-; trade; industrial composite. *Catalogue 72-002, February*

verage Weekly Hours, Average Hourly Earnings, Average Vages of Hourly-rated Wage-earners 1961-1967 for:

Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)

(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n^{O} 72-201 au catalogue, 1957-1967;* Review of Man Hours and Hourly Earnings, *n^{O} 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n^{O} *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n^{O} *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n^{O} 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1974

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of Catalogue no. 72-002.

E.1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained in "Employment, Earnings and Hours, January – April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la construct l'entretien des routes et des ponts. Voir le n^{O} *72-00 catalogue, juin 1972.*

Heures hebdomadaires moyennes, rémunération horaire moy gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlan - Québec - pour l'entretien des routes et des ponts - n^{O} *72-002 au catal décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Av Weekly Hours and Average Hourly Earnings, Monthly and A Statistics, January 1961 - May 1965, n^{O} 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pu pour 1965 figurent dans les n^{OS} *72-201* et *72-202* au catal *1957-1967.*

Toutes les autres données mensuelles et annuelles disponibles publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1966-1968.*

Toutes les autres données mensuelles et annuelles disponibles pour sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1967-19*

Toutes les autres données mensuelles et annuelles disponibles pe période 1968-1970 sont publiées dans les n^{OS} *72-201* et *72-20* catalogue, *1968-1970.*

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973, Ca Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les maga rayons, le commerce de détail, le commerce et l'ensemble des indu Voir le n^{O} *72-002 au catalogue, juillet 1974.*

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pour ge de femmes, le nombre de salariés, rémunération hebdomadaire moye janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretie routes et ponts, transports, transports, communication et autres se publics et l'ensemble des industries. Voir le n^{O} *72-002 au cata septembre 1974.*

Nombre d'employés, ensemble des ouvriers, ouvriers (heures rées), rémunération hebdomadaire moyenne des employés, ensemb ouvriers, heures hebdomadaires— moyennes et rémunération horaire m des ouvriers (heures— *déclarées)* de janvier 1973 à juin 1974 pour C et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72-0 catalogue, septembre 1974.*

D. 1977

On a revisé les données de janvier à juin 1977 pour la Sask wan, la région des Prairies, la Colombie-Britannique et le Cana divisions de l'activité économique impliquées sont: la construct transports, communications et autres services publics et l'ensemb industries. Ces données furent publiées dans l'examplaire de sept 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travail p mois de janvier à juin 1978 ont été révisées pour toutes les br d'activité et toutes les régions géographiques. Les données révisée janvier à avril 1978 inclusivement figurent dans *Emploi, gains et d travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pe et juin 1978 paraissent dans le numéro de juillet 1978 du 72-002.

(1) Les numéros des publications susmentionnées renferment les de données disponibles pour toute série donnée. Les données rel ces séries figurant dans d'autres numéros de ces publications p avoir été rectifiées depuis.

CONCEPTS AND METHODS

s

he Monthly Employment, Payrolls and Manhours survey is to measure the month-to-month trends of employment, paid l earnings for the commercial sector of the economy with the of agriculture, fishing and trapping.

hese measures are expressed in an index form for employ- as weekly averages for earnings and hours paid for. The ompiled and published at detailed industrial and geographic

f Data

ie statistics contained in this report are based on information through a mail census of "larger firms".

e firm is defined as any business entity whether incorpo- ot; it comprises sole proprietorships, partnerships, corpora- other forms of organization such as co-operatives. Most sist of only one "establishment" (see definition under Classification) but in some cases the firm is made up of a f establishments which may or may not be engaged in the of economic activity.

firm is considered as "larger" when it employs 20 or more any one month of the year. Although the intent of the o cover all such firms, it also includes some firms with less mployees and excludes some firms with more than 20 ; the reason is that, in practice, it is not always possible to romptly enough employment fluctuations in individual

e universe for the survey is derived from a central file of maintained by the Business Register and Profiling Division s Canada.

commercial industries are covered by the survey, with the of agriculture, fishing and trapping; by definition such ercial sectors as education and related services, health and rvices, religious organizations, private households and inistration and defense are excluded. Because the survey is "larger firms", the proportion of total employment covered ey varies among industries, provinces and urban areas. The able shows annual employment as reported in the survey tage of the estimated total number of employees, the latter nated by adding together data from the Employment, nd Manhours survey and data from a sample survey of ms plus supplementary surveys. Estimates of the total employees are published in "Estimates *of Employees by nd Industry"* (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie"* numéro 72-008 au catalogue.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1977 Annual Averages(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sampl survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête su l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréatifs commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private household are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compr l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimatio de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciaux l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus da l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'act économique qui est déterminée en fonction de leur activité principal l'entreprise n'exerce qu'un seul genre d'activité économique, le classe est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, exemple lorsqu'elle possède plus d'un établissement. À des fins statisti on définit l'établissement, qui consiste habituellement en une usine, mine, un magasin ou une unité semblable, comme la plus petite constituant un ensemble d'exploitation distinct en mesure de déclare les éléments de base de la statistique des activités économiques, permettent de calculer la "valeur ajoutée" ou la "majoration brute" "bénéfice brut", ainsi que des données sur l'emploi et la rémunérati

Pour permettre d'obtenir des statistiques géographiques déta l'établissement est souvent subdivisé en unités déclarantes qui, qu'elles ne puissent fournir toutes les statistiques de base, sont en m de déclarer des données sur l'emploi et la rémunération pour des en particuliers.

The industrial classification of the statistics contained in this based on the Standard Industrial Classification for 1960. A ion of the various industries and groups of industries is d in the "Standard Industrial Classification Manual", Cata- o. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 nd to the codes of this manual. These tables also contain the g groupings which are not part of the "Standard *Industrial ation Manual*".

Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

Durable goods manufacturing (durable) comprises wood roducts (250-259), furniture and fixtures (260-269), primary etal industries (290-298), metal fabricating industries (300- 09), machinery except electrical (310-318), transportation quipment (320-329), electrical products (330-339), and on-metallic mineral products (340-359).

Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied indus- tries (270-274), printing, publishing and allied industries 280-289), petroleum and coal products (360-369), chemi- cals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).

Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).

Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction 409).

The synthetic textile industry (201) is sub-divided into spun arn and fabrics (2011) and filament yarn and staple fibres 2012).

Head Offices, sales and auxiliary units This special group ncludes head offices, sales branches and research laborato- ies for the following major groups of manufacturing: food nd beverages (100), rubber products (160), paper and llied industries (270), primary metal industries (290), lectrical products (330), and chemicals and chemical pro- lucts (370).

hic Classification

eporting units are assigned to a province, a county (as y the Census of Population) and, where applicable, to an a. Data for Newfoundland, Prince Edward Island, Nova d New Brunswick are aggregated in some tables to give for the Atlantic Region. Similarly, data for Manitoba, kwan and Alberta are added together to provide totals for the egion. The 1966 Census of Population's "Metropolitan finitions were used for the nineteen applicable urban areas; itions used for other urban areas are based on a labour ncept. The urban areas usually consist of the urban centre as te surrounding territory. A list showing the territory included ibulated urban area is available from the Employment and

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procur liste indiquant le territoire compris dans chaque région urbaine fi dans les tableaux en vous adressant à la Section des statistiques de l' et de la rémunération. Les chiffres des unités déclarantes situées aille dans une région urbaine indiquée dans les tableaux ou non attribué comté dont le nom figure sur la liste font partie des totaux provi régionaux et nationaux.

Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. **Employee**

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensionners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept c jours du mois de référence. En pratique, étant donné q d'entreprises tiennent des registres de paye pour cette période on leur permet de faire porter leur déclaration sur la (les) der période(s) de paye de chaque mois. Lorsque la période de p laquelle porte la déclaration dépasse une semaine, on raj données en effectuant le calcul suivant: on divise le nombre d'activité hebdomadaire de l'entreprise par le nombre d ouvrables compris dans la période de paye sur laquelle déclaration. Si, en raison d'une grève, d'un jour férié ou facteurs semblables, les données déclarées ne sont pas représe de la période de référence, on procède aux rajustements qui sent afin de traduire fidèlement la situation pendant les sept jours du mois.

2. **Salarié**

Toute personne qui est rétribuée pour ses services ou ses pendant la semaine de référence et pour laquelle l'employeur contributions au R.P.C. ou au R.R.Q. et à la caisse d'as chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps p salariés à temps partiel (ceux qui travaillent régulièrement un d'heures inférieur à la semaine normale de travail de l'entre les salariés occasionnels (ceux qui sont embauchés de façon t re ou irrégulière et qui ont travaillé au moins sept heures au la période de référence).

Le concept des salariés exclut les propriétaires et les pa d'entreprises non constituées en corporation et ceux qui poss bureau pour l'exercice d'une profession, les travailleurs auton travailleurs familiaux non rémunérés, les bénévoles, les ret travailleurs à domicile, les membres de corps élus ou no personnel militaire et les personnes fournissant des serv établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une pa période de référence mais qui étaient en chômage ou en grèv le reste de la période. Les personnes n'ayant pas touché de la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelle employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillant ment à la production et à des opérations assir particulier le personnel d'entretien, d'entrepôt et de le personnel de sécurité, les chauffeurs-livreurs, le itinérants, les commis des magasins de détail, les s les contremaîtres remplissant des fonctions analogu des ouvriers dont ils ont la charge, etc. Toutes ces sont considérées comme des ouvriers, que leurs g fondés sur des taux de rémunération mensuels, h autres. Les salaires hebdomadaires moyens sont ca tous les ouvriers, mais les heures hebdomadaires m les gains horaires moyens sont calculés uniquemen dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Methodology

The data appearing in this report were collected by means of questionnaires mailed monthly to all firms which employ 20 or more persons in any one month of the year. In order to improve the quality of data, the response rate is increased through two reminders mailed to non-respondents one month and two months after the original mailout. If the two reminders do not produce a response, the Field Division of Statistics Canada attempts to obtain the required data by telephone or in a personal interview. These steps result in a final response rate of over 80%. Firms for which no response is obtained are accounted for in the employment, earnings and hours tables of the publication. To do this, the unknown figures are replaced by estimates based on the behaviour of the reporting unit in the previous month and on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. **Data Edit**

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. **Imputation**

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité déclarante fournies le mois précédent et de celles fournies par les unités déclarantes qui ressemblent à l'entreprise non répondante sur le plan du classement par activité économique, la taille et le lieu géographique, et qui ont répondu pour le mois observé.

1. **Vérification des données**

Tous les questionnaires remplis renvoyés à Statistique Canada sont soigneusement vérifiés à la main et par ordinateur pour assurer qu'ils sont complets, cohérents et exacts. Pour être vérifiées par ordinateur les réponses sont réparties en groupes d'imputation constitués en fonction du classement par activité économique, du lieu géographique et de la taille de l'unité déclarante. La composition de ces groupes est telle qu'ils regroupent des unités déclarantes qui présentent les mêmes caractéristiques et dont les caractéristiques affichent les mêmes liens entre elles. Cette vérification permet de comparer la valeur d'une caractéristique (nombre de salariés, heures de travail, gains par salarié, rapport du nombre actuel de salariés à celui du mois précédent, etc.) par rapport à la valeur de la caractéristique correspondante pour tout le groupe d'imputation. L'écart qui peut séparer la valeur d'une caractéristique et la valeur moyenne de la même caractéristique pour le groupe d'imputation tout entier est calculé séparément pour chaque groupe et pour chaque caractéristique, et dépend de l'homogénéité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour tout le groupe d'imputation, on le remplace par une valeur qui comporte la variance maximum permise par la vérification par ordinateur. Il n'est pas toujours possible de trouver une valeur qui se situe à l'intérieur de la limite permise par l'ordinateur; si tel est le cas, on remplace le chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde par la modification indue d'un chiffre qui était exact au départ. Cela n'est pas trop grave si l'on considère que ce procédé mécanique permet de déceler efficacement un grand nombre d'erreurs graves comme des points décimaux mal placés, des erreurs d'inscription des données, des problèmes attribuables à une mauvaise interprétation des définitions ou des instructions.

2. **Imputation**

Chaque mois, on reçoit une réponse complète ou partielle de certaines unités déclarantes, alors que d'autres renvoient des questionnaires qui sont rejetés à la vérification et qui ne peuvent être corrigés par machine. Une partie ou la totalité des données pour ces unités doivent donc être imputées. Cela signifie que les caractéristiques incorrectes ou inconnues sont remplacées par des valeurs calculées en fonction d'autres caractéristiques de la même déclaration de l'entreprise, de la déclaration du mois précédent et des caractéristiques du groupe d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclarations chaque mois. Comme dans le cas de la correction automatique des erreurs, il est possible qu'une valeur exacte au départ soit remplacée par une autre. Toutefois, il arrive plus souvent qu'un chiffre erroné ou inexistant soit remplacé par un chiffre plus proche de la valeur réelle, fondé sur la déclaration de l'entreprise du mois précédent et sur celles d'entreprises qui font partie d'une branche d'activité semblable, appartiennent au même groupe de taille et sont situées dans le même lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hommes étant une enquête exhaustive, toute inexactitude dans les résultats est attribuable à une erreur d'observation. Parmi les exemples de sources d'erreurs d'observation, citons l'impossibilité d'obtenir des renseignements de toutes les unités de l'échantillon, les renseignements inexacts fournis par

nd processing of the data. Non-sampling errors are difficult re and no estimates of this type of error have been obtained urvey as yet. However, non-sampling errors have been kept mum by the use of a carefully designed and carefully worded naire, the relative simplicity of the data requested, follow-up espondents, thorough editing of data and control of the g operations.

l Presentation

a Revision

n month, statistics for three latest months are prepared by the loyment and Payrolls Section. Data for the first, most nt month, are entitled first estimates. They are based on a ed number of returns (usally about 55%) and only highly egated figures are released in the Statistics Canada *Daily* and First Estimates table of this publication. Simultaneously, nd estimates are prepared for the month immediately pre- ng the most current data and third estimates for the month to that. Both of these latter estimates are of course, of er quality than that of the first estimates because of the er rate of returns (approximately 75% and 82% respectively). sequently, full details for both of these months are shown in publication.

r completion of the third estimate, further revisions to the are made to incorporate late returns and corrected informa- received from respondents or to rectify mechanical errors. er corrections are calculated immediately and appear in the rical and special tables and in the column for the previous in tables2, 3 and 4 of this publication.

x Numbers

x numbers are calculated by dividing the current month's oyment (or payroll) by the monthly - average of the total year employment (or payroll).

index numbers constitute a better measure of the monthly s in statistical series than the actual values because they are ffected by certain statistical changes. For example, a large erroneously missing from the survey can be introduced by ting both the current and base year data and, thus, will not rt the monthly changes indicated by the index numbers. ever, the measure of the monthly trend calculated from the l value will be biased because the additions which should be ted in all months are only included from the time the ction is made.

ages

average weekly hours figure is obtained by dividing total y man-hours by the number of wage-earners who worked hours. Average hourly earnings are obtained by dividing weekly wages of hourly-rated wage-earners by their total y hours. Both of these averages apply only to the subset of -earners for whom hourly details are reported. It should be that total hours include overtime hours actually worked hat the wage-earners total includes part-time wage-earners casuals working more than seven hours during the survey nce week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. **Révision des données**

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées sur-le-champ; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication.

2. **Nombres-indices**

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. **Moyennes**

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, *earnings and hours, seasonally-adjusted series, January 1961 – December 1971*" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont ca par des mouvements saisonniers, cycliques et irréguliers. Une désaisonnalisée est une série dont on a éliminé les effets des m ments saisonniers. Les mouvements saisonniers sont ceux qui causés par des événements annuels réguliers comme les changen de température, les cycles agricoles, les jours fériés et les vacanc convient de noter que la série désaisonnalisée contient des fluctua irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du *U.S. Bu of the Census* est utilisée pour désaisonnaliser. Ce système perm déceler les mouvements saisonniers, tendanciels et irréguliers au d'une période de plusieurs années et, à la lumière des mouven passés, d'estimer les coefficients saisonniers appropriés pour l'a en cours. Sur une base annuelle, toute la série chronologiqu données désaisonnalisées est révisée à la lumière des renseignem les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désais lisés de l'emploi, ainsi que les heures hebdomadaires moyennes gains horaires moyens pour certaines séries statistiques. Vous tr rez d'autres séries désaisonnalisées dans le bulletin *Emploi, rému tion et heures, séries désaisonnalisées, janvier 1961 – décembre* numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer confidentialité des réponses des entreprises soit respectée.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

- - amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

- - nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf ind contraire) les colonnes laissées en blanc dans le cas des employés ouvriers indiqués séparément, signifient que les données relativ ouvriers pour lesquels les heures sont enregistrées ne sor disponibles.

COMMENTARY

First estimates(1) – August 1978 (Seasonally Adjusted)

The first estimates of the Canadian industrial composite(2) of employment (1961 = 100) for August 1978 indicated a 0.1% ase over July. Industry divisions not participating in the increase forestry, construction and service all of which showed a decline. e region level all increased except the Atlantic, which did not ge, and Ontario, which declined.

Average weekly earnings rose by 0.4% at the national compos- vel in August. Gains were recorded in all industry divisions t forestry, mining (including milling) and construction, all ns posted gains.

Preliminary Data - July 1978

oyment

Seasonally adjusted, preliminary data for July increased by at the Canadian industrial composite index of employment. uction and transportation, communication and other utilities red losses while the remaining industry divisions advanced. All s participated in the overall increase.

gs and Hours

Seasonally adjusted, average weekly earnings increased by t the national industrial composite level. Manufacturing, uction, service and finance, insurance and real estate posted while the remaining industry divisions declined. Quebec, o and British Columbia recorded gains and the other two declined.

Unadjusted average weekly earnings declined by 0.2% to 7 at the Canadian industrial composite level. Average hourly gs increased by two cents in mining (including milling) to $8.67 opped by one cent in manufacturing to $6.81 and in construc- $10.07. Average weekly hours were down in mining (including) and manufacturing but up in construction.

e note on Statistical Presentation under Concepts and Methods the back of this publication.
dustrial Composite is the sum for all industries with the ception of agriculture, fishing and trapping, education and ated services, health and welfare services, religious organi- tions, private households and public administration and de- nce. All statistics are based on returns received from employers ving twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – août 1978 (Chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries du Canada révèlent une progression de 0.1% de juillet à août. Les divisions de l'activité économique qui n'ont pas participé à cette hausse sont le forestage, la construction et les services qui montrent un recul. Au niveau régional, toutes les régions ont accusé des gains à l'exception de la région de l'Atlantique qui est demeurée inchangée et de l'Ontario qui a régressé.

Les gains hebdomadaires moyens ont augmenté de 0.4% de juillet à août au niveau de l'ensemble des industries du Canada. On a observé des hausses dans toutes les régions et dans toutes les divisions de l'activité économique exception faite du forestage, des mines (y compris le broyage) et de la construction.

Données provisoires - juillet 1978

Emploi

Après désaisonnalisation, les données provisoires pour juillet montre une hausse de 0.4% au niveau de l'ensemble des industries du Canada. Exception faite de la construction et du transport, communication et autres services publics qui ont régressé, toutes les divisions de l'activité économique ont enregistré une augmentation. Toutes les régions ont participé à cette hausse générale.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, se sont accrus de 0.2% au niveau de l'ensemble des industries. Les manufactures, la construction, les services et les finances, assurances et immeuble ont connu une augmentation alors qu'on a observé un recul dans les autres divisions de l'activité économique. Le Québec, l'Ontario et la Colombie-Britannique ont enregistré des gains, mais les autres régions ont subi des pertes.

Les gains hebdomadaires moyens, non désaisonnalisés, ont affiché une baisse de 0.2% à $266.57 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens se sont accrus de 2 cents ($8.67) dans les mines (y compris le broyage), mais ont régressé de 1 cent dans les manufactures ($6.81) et dans la construction ($10.07). Le nombre moyen d'heures hebdomadaires travaillées a enregistré une baisse dans les mines (y compris le broyage) et les manufactures alors qu'il a affiché une hausse dans la construction.

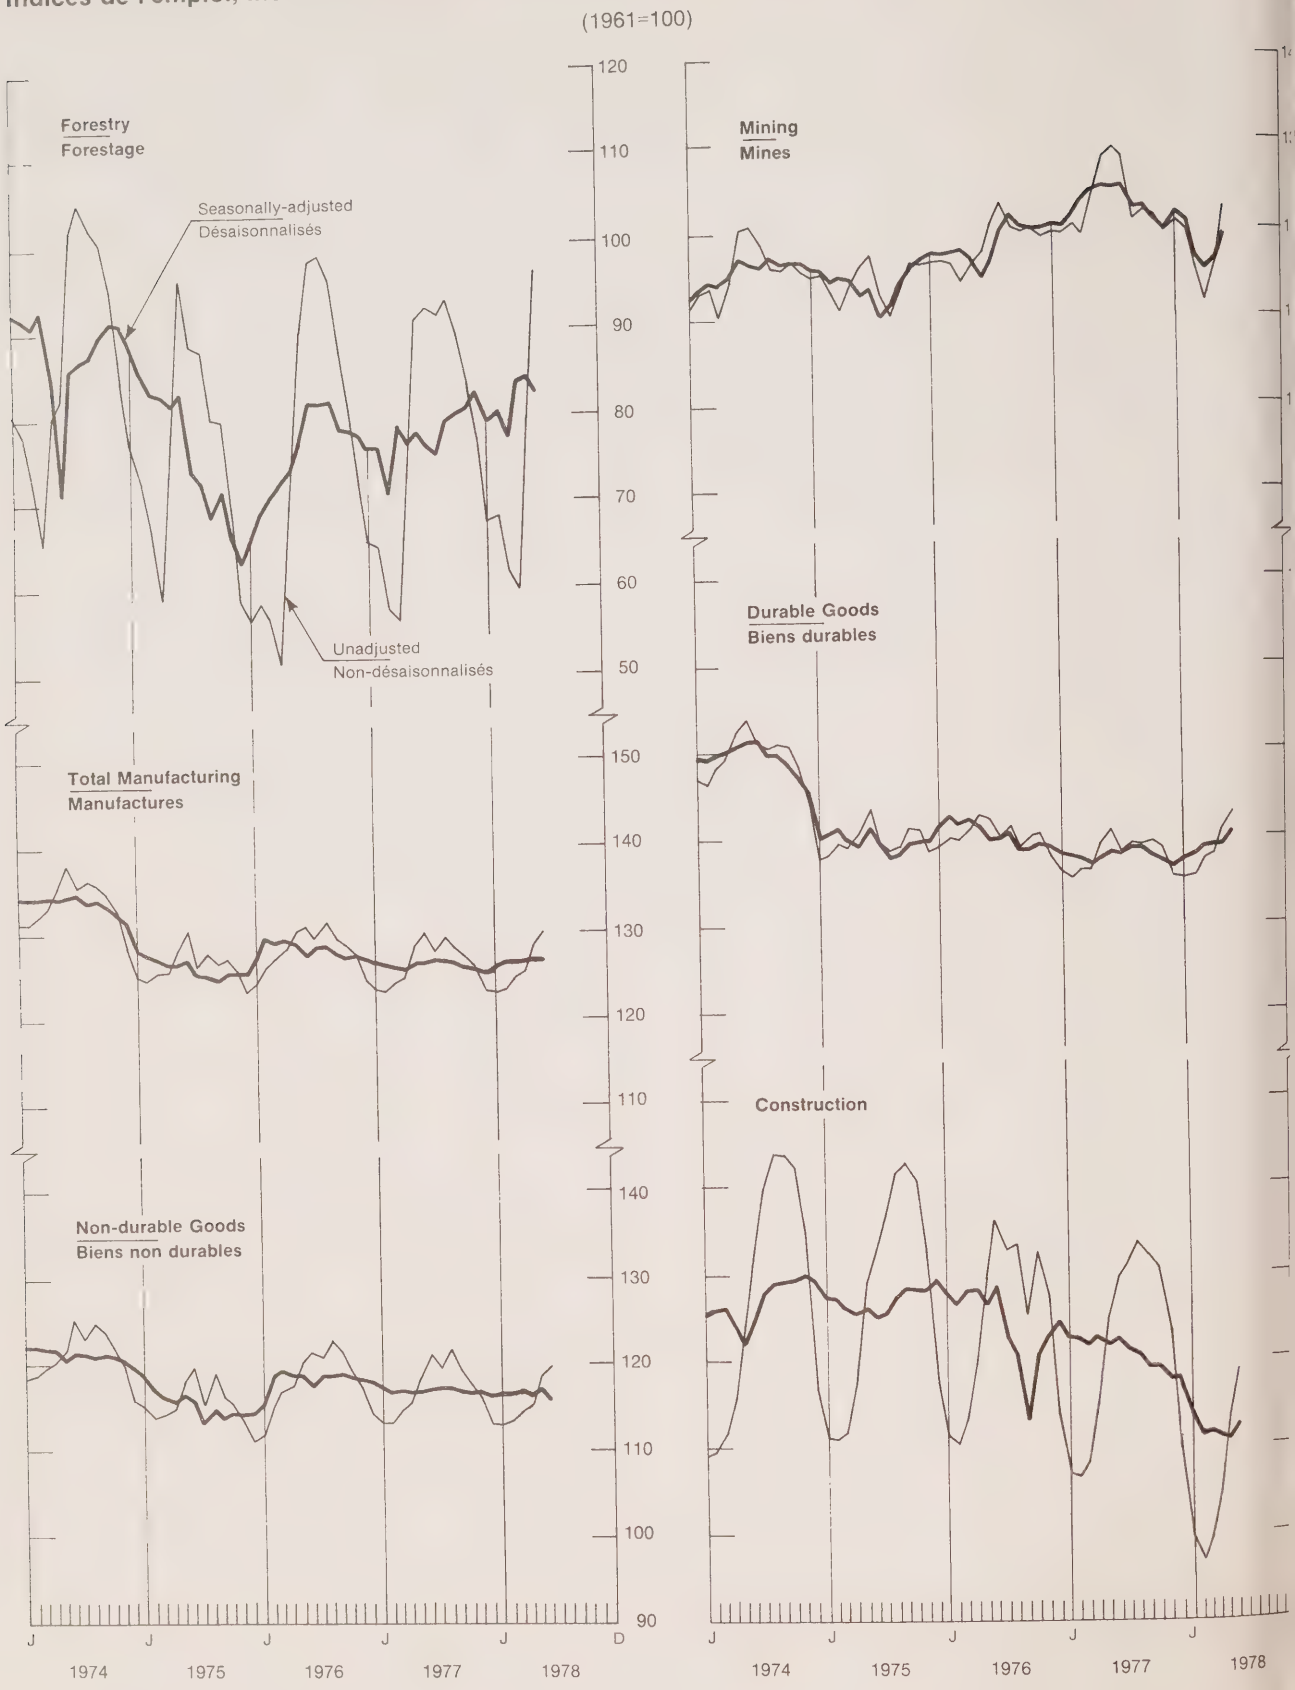

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

te: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

-1960

Monthly data were not published but are available on

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours nd Hourly Earnings, *Catalogue 72-202, 1957-67.*

1970

Employment Indexes, 1961-1964, for Canada and Ontario, for s, bridges and streets; engineering; construction; highway ge maintenance; transportation; and transportation, commu- and other utilities. Employment, Earnings and Hours, *Cata--002, October 1971.*

mployment Indexes, 1965-1967, for Canada and Ontario, for s, bridges and streets; engineering; construction; highway ge maintenance; transportation; and transportation, commu- and other utilities. *Catalogue 72-002, February 1968.*

verage Weekly Earnings, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

otia: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

erage Weekly Earnings, 1968-1970, for Canada, Ontario nto, for scientific and professional equipment; miscellaneous ring industries; non-durable goods; manufacturing; whole-; trade; industrial composite. *Catalogue 72-002, February*

erage Weekly Hours, Average Hourly Earnings, Average ages of Hourly-rated Wage-earners 1961-1967 for:

lighways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n^O 72-201 au catalogue, 1957-1967;* Review of Man Hours and Hourly Earnings, *n^O 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n^O *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n^O *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n^O 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n^O *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1974

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of Catalogue no. 72-002.

E.1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained in "Employment, Earnings and Hours, January – April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la construc l'entretien des routes et des ponts. Voir le n^{O} *72-00 catalogue, juin 1972.*

Heures hebdomadaires moyennes, rémunération horaire moy gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlan - Québec - pour l'entretien des routes et des ponts - n^{O} *72-002 au cata décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Av Weekly Hours and Average Hourly Earnings, Monthly and A Statistics, January 1961 - May 1965, n^{O} 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pu pour 1965 figurent dans les n^{OS} *72-201* et *72-202* au cata *1957-1967.*

Toutes les autres données mensuelles et annuelles disponible publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1966-1968.*

Toutes les autres données mensuelles et annuelles disponibles pou sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1967-1*

Toutes les autres données mensuelles et annuelles disponibles p période 1968-1970 sont publiées dans les n^{OS} *72-201* et *72-2* catalogue, *1968-1970.*

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973, C Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les mag rayons, le commerce de détail, le commerce et l'ensemble des ind Voir le n^{O} *72-002 au catalogue, juillet 1974.*

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pou ge de femmes, le nombre de salariés, rémunération hebdomadaire moye janvier 1973 à juin 1974, pour Canada et Québec, pour l'entreti routes et ponts, transports, transports, communication et autres s publics et l'ensemble des industries. Voir le n^{O} *72-002 au cat septembre 1974.*

Nombre d'employés, ensemble des ouvriers, ouvriers (heures rées), rémunération hebdomadaire moyenne des employés, ensem ouvriers, heures hebdomadaires— moyennes et rémunération horaire m des ouvriers (heures— *déclarées)* de janvier 1973 à juin 1974 pour et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72- catalogue, septembre 1974.*

D. 1977

On a revisé les données de janvier à juin 1977 pour la Sas wan, la région des Prairies, la Colombie-Britannique et le Can divisions de l'activité économique impliquées sont: la construct transports, communications et autres services publics et l'ensem industries. Ces données furent publiées dans l'examplaire de sep 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travail mois de janvier à juin 1978 ont été révisées pour toutes les b d'activité et toutes les régions géographiques. Les données révisé janvier à avril 1978 inclusivement figurent dans *Emploi, gains et travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles p et juin 1978 paraissent dans le numéro de juillet 1978 du 72-002.

(1) Les numéros des publications susmentionnées renferment les d données disponibles pour toute série donnée. Les données re ces séries figurant dans d'autres numéros de ces publications avoir été rectifiées depuis.

CONCEPTS AND METHODS

ves

The Monthly Employment, Payrolls and Manhours survey is d to measure the month-to-month trends of employment, paid nd earnings for the commercial sector of the economy with the n of agriculture, fishing and trapping.

These measures are expressed in an index form for employ- d as weekly averages for earnings and hours paid for. The compiled and published at detailed industrial and geographic

of Data

The statistics contained in this report are based on information through a mail census of "larger firms".

The firm is defined as any business entity whether incorpo- not; it comprises sole proprietorships, partnerships, corpora- d other forms of organization such as co-operatives. Most nsist of only one "establishment" (see definition under l Classification) but in some cases the firm is made up of a of establishments which may or may not be engaged in the d of economic activity.

firm is considered as "larger" when it employs 20 or more n any one month of the year. Although the intent of the to cover all such firms, it also includes some firms with less employees and excludes some firms with more than 20 s; the reason is that, in practice, it is not always possible to promptly enough employment fluctuations in individual

ne universe for the survey is derived from a central file of s maintained by the Business Register and Profiling Division cs Canada.

l commercial industries are covered by the survey, with the of agriculture, fishing and trapping; by definition such nercial sectors as education and related services, health and rvices, religious organizations, private households and ninistration and defense are excluded. Because the survey is "larger firms", the proportion of total employment covered vey varies among industries, provinces and urban areas. The table shows annual employment as reported in the survey ntage of the estimated total number of employees, the latter mated by adding together data from the Employment, nd Manhours survey and data from a sample survey of ms plus supplementary surveys. Estimates of the total employees are published in "Estimates *of Employees by nd Industry*" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie*" numéro 72-008 au catalogue.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1977 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1977(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a s survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enqu l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres en supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services réc commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private house are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y c l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'esti de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non comme l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclu l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d économique qui est déterminée en fonction de leur activité prin l'entreprise n'exerce qu'un seul genre d'activité économique, le cl est simple. Les problèmes surgissent lorsqu'elle en exerce plus exemple lorsqu'elle possède plus d'un établissement. À des fins sta on définit l'établissement, qui consiste habituellement en une u mine, un magasin ou une unité semblable, comme la plus pe constituant un ensemble d'exploitation distinct en mesure de déc les éléments de base de la statistique des activités économi permettent de calculer la "valeur ajoutée" ou la "majoration bru "bénéfice brut", ainsi que des données sur l'emploi et la rémun

Pour permettre d'obtenir des statistiques géographiques l'établissement est souvent subdivisé en unités déclarantes qu'elles ne puissent fournir toutes les statistiques de base, sont de déclarer des données sur l'emploi et la rémunération pour de particuliers.

The industrial classification of the statistics contained in this s based on the Standard Industrial Classification for 1960. A ion of the various industries and groups of industries is d in the "Standard Industrial Classification Manual", Cata- o. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 nd to the codes of this manual. These tables also contain the g groupings which are not part of the "Standard *Industrial ation Manual*".

Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

Durable goods manufacturing (durable) comprises wood roducts (250-259), furniture and fixtures (260-269), primary etal industries (290-298), metal fabricating industries (300- 09), machinery except electrical (310-318), transportation quipment (320-329), electrical products (330-339), and on-metallic mineral products (340-359).

Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied indus- ries (270-274), printing, publishing and allied industries 280-289), petroleum and coal products (360-369), chemi- als and chemical products (370-379), and miscellaneous nanufacturing industries (380-399).

Building construction (404,421). It is the sum of general ontractors (404) and special trade contractors (421).

Engineering construction (406,409) It includes highway, ridge and street construction (406) and other construction 409).

The synthetic textile industry (201) is sub-divided into spun arn and fabrics (2011) and filament yarn and staple fibres 2012).

Head Offices, sales and auxiliary units This special group ncludes head offices, sales branches and research laborato- es for the following major groups of manufacturing: food nd beverages (100), rubber products (160), paper and llied industries (270), primary metal industries (290), lectrical products (330), and chemicals and chemical pro- ucts (370).

ic Classification

porting units are assigned to a province, a county (as the Census of Population) and, where applicable, to an a. Data for Newfoundland, Prince Edward Island, Nova d New Brunswick are aggregated in some tables to give for the Atlantic Region. Similarly, data for Manitoba, wan and Alberta are added together to provide totals for the egion. The 1966 Census of Population's "Metropolitan finitions were used for the nineteen applicable urban areas; ions used for other urban areas are based on a labour ncept. The urban areas usually consist of the urban centre as surrounding territory. A list showing the territory included pulated urban area is available from the Employment and

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

Definitions

1. Reference Period

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. Employee

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procur liste indiquant le territoire compris dans chaque région urbaine fi dans les tableaux en vous adressant à la Section des statistiques de l'e et de la rémunération. Les chiffres des unités déclarantes situées ailleu dans une région urbaine indiquée dans les tableaux ou non attribuée comté dont le nom figure sur la liste font partie des totaux provin régionaux et nationaux.

Définitions

1. Période de référence

En théorie, les données sur l'emploi se rapportent aux sept d jours du mois de référence. En pratique, étant donné qu d'entreprises tiennent des registres de paye pour cette période p on leur permet de faire porter leur déclaration sur la (les) dern période(s) de paye de chaque mois. Lorsque la période de pa laquelle porte la déclaration dépasse une semaine, on raju données en effectuant le calcul suivant: on divise le nombre d d'activité hebdomadaire de l'entreprise par le nombre de ouvrables compris dans la période de paye sur laquelle p déclaration. Si, en raison d'une grève, d'un jour férié ou d facteurs semblables, les données déclarées ne sont pas représen de la période de référence, on procède aux rajustements qui s sent afin de traduire fidèlement la situation pendant les sept d jours du mois.

2. Salarié

Toute personne qui est rétribuée pour ses services ou ses al pendant la semaine de référence et pour laquelle l'employeur ve contributions au R.P.C. ou au R.R.Q. et à la caisse d'assu chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps pl salariés à temps partiel (ceux qui travaillent régulièrement un n d'heures inférieur à la semaine normale de travail de l'entrep les salariés occasionnels (ceux qui sont embauchés de façon ter re ou irrégulière et qui ont travaillé au moins sept heures au c la période de référence).

Le concept des salariés exclut les propriétaires et les part d'entreprises non constituées en corporation et ceux qui possè bureau pour l'exercice d'une profession, les travailleurs autono travailleurs familiaux non rémunérés, les bénévoles, les retra travailleurs à domicile, les membres de corps élus ou nom personnel militaire et les personnes fournissant des servic établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une part période de référence mais qui étaient en chômage ou en grève p le reste de la période. Les personnes n'ayant pas touché de pa la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillant e ment à la production et à des opérations assimi particulier le personnel d'entretien, d'entrepôt et de l le personnel de sécurité, les chauffeurs-livreurs, les v itinérants, les commis des magasins de détail, les serv les contremaîtres remplissant des fonctions analogues des ouvriers dont ils ont la charge, etc. Toutes ces p sont considérées comme des ouvriers, que leurs gain fondés sur des taux de rémunération mensuels, hor autres. Les salaires hebdomadaires moyens sont calcu tous les ouvriers, mais les heures hebdomadaires moy les gains horaires moyens sont calculés uniquement p dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

rnings

rnings of wage-earners and salaried employees represent gross y for the week, before deductions for taxes, unemployment urance contributions, etc. Gross pay includes salaries, straight ıe wages, piece-work and regular commission earnings, reg- r paid incentive, cost of living and other bonuses, overtime nings and payments to persons absent with pay in the survey erence week. The payroll concept does not include supplemen- y labour costs such as employers' contributions to unemploy- nt insurance, medical plans, Workmen's Compensation and er welfare plans, nor does it include the cost of equipment, the ue of room and board, compensation in kind, travelling enses, retirement gratuities, bonuses paid at irregular and requent intervals or directors' fees.

: term "earnings" is used to denote the total of weekly wages he wage-earners and salaries of the salaried employees. The lications prior to March 1971 contained these data combined er "Average Weekly Wages and Salaries". These data are parable with "Average Weekly Earnings" of total employ- in the present publication. The system now provides separate nings data for all wage-earners and salaried employees reas formerly only "Average Weekly Wages" for hourly- d wage-earners were available.

l Absence

l absence comprises paid holidays, vacation, sick leave ding industrial injury and personal leave such as avement leave, jury duty, etc.

dard Work Week

standard work week is the number of hours or days of work nally scheduled for the majority of full-time employees.

logy

ıe data appearing in this report were collected by means of aires mailed monthly to all firms which employ 20 or more ı any one month of the year. In order to improve the quality he response rate is increased through two reminders mailed -respondents one month and two months after the original If the two reminders do not produce a response, the Field f Statistics Canada attempts to obtain the required data by or in a personal interview. These steps result in a final ate of over 80%. Firms for which no response is obtained are nted for in the employment, earnings and hours tables of cation. To do this, the unknown figures are replaced by sed on the behaviour of the reporting unit in the previous d on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. Imputation

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité décla fournies le mois précédent et de celles fournies par les unités déclaran ressemblent à l'entreprise non répondante sur le plan du classeme activité économique, la taille et le lieu géographique, et qui ont ré pour le mois observé.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canad soigneusement vérifiés à la main et par ordinateur pour assure sont complets, cohérents et exacts. Pour être vérifiées par ordi les réponses sont réparties en groupes d'imputation constit fonction du classement par activité économique, du lieu géogra et de la taille de l'unité déclarante. La composition de ces grou telle qu'ils regroupent des unités déclarantes qui présentent les caractéristiques et dont les caractéristiques affichent les mêm entre elles. Cette vérification permet de comparer la valeu caractéristique (nombre de salariés, heures de travail, ga salarié, rapport du nombre actuel de salariés à celui du mois dent, etc.) par rapport à la valeur de la caractéristique correspo pour tout le groupe d'imputation. L'écart qui peut séparer la d'une caractéristique et la valeur moyenne de la même caracté pour le groupe d'imputation tout entier est calculé séparéme chaque groupe et pour chaque caractéristique, et dépend de l'h néité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour groupe d'imputation, on le remplace par une valeur qui com variance maximum permise par la vérification par ordinateur. pas toujours possible de trouver une valeur qui se situe à l'inté la limite permise par l'ordinateur; si tel est le cas, on rem chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde modification indue d'un chiffre qui était exact au départ. Cela r trop grave si l'on considère que ce procédé mécanique pe déceler efficacement un grand nombre d'erreurs graves com points décimaux mal placés, des erreurs d'inscription des do des problèmes attribuables à une mauvaise interprétation de tions ou des instructions.

2. Imputation

Chaque mois, on reçoit une réponse complète ou partielle de unités déclarantes, alors que d'autres renvoient des questionn sont rejetés à la vérification et qui ne peuvent être corri machine. Une partie ou la totalité des données pour ces unités donc être imputées. Cela signifie que les caractéristiques incor inconnues sont remplacées par des valeurs calculées en d'autres caractéristiques de la même déclaration de l'entrepri déclaration du mois précédent et des caractéristiques du d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclaration mois. Comme dans le cas de la correction automatique des e est possible qu'une valeur exacte au départ soit remplacée autre. Toutefois, il arrive plus souvent qu'un chiffre erroné existant soit remplacé par un chiffre plus proche de la valeur fondé sur la déclaration de l'entreprise du mois précédent et d'entreprises qui font partie d'une branche d'activité sem appartiennent au même groupe de taille et sont situées dans lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-homm une enquête exhaustive, toute inexactitude dans les résultats est att à une erreur d'observation. Parmi les exemples de sources d d'observation, citons l'impossibilité d'obtenir des renseignements les unités de l'échantillon, les renseignements inexacts fourni

and processing of the data. Non-sampling errors are difficult sure and no estimates of this type of error have been obtained survey as yet. However, non-sampling errors have been kept nimum by the use of a carefully designed and carefully worded nnaire, the relative simplicity of the data requested, follow-up -respondents, thorough editing of data and control of the ing operations.

cal Presentation

ta Revision

ch month, statistics for three latest months are prepared by the nployment and Payrolls Section. Data for the first, most rent month, are entitled first estimates. They are based on a ited number of returns (usally about 55%) and only highly gregated figures are released in the Statistics Canada *Daily* and e First Estimates table of this publication. Simultaneously, ond estimates are prepared for the month immediately pre- ding the most current data and third estimates for the month or to that. Both of these latter estimates are of course, of her quality than that of the first estimates because of the her rate of returns (approximately 75% and 82% respectively). nsequently, full details for both of these months are shown in s publication.

er completion of the third estimate, further revisions to the a are made to incorporate late returns and corrected informa- n received from respondents or to rectify mechanical errors. rger corrections are calculated immediately and appear in the torical and special tables and in the column for the previous r in tables2, 3 and 4 of this publication.

ex Numbers

ex numbers are calculated by dividing the current month's ployment (or payroll) by the monthly - average of the total e year employment (or payroll).

e index numbers constitute a better measure of the monthly nds in statistical series than the actual values because they are effected by certain statistical changes. For example, a large n erroneously missing from the survey can be introduced by usting both the current and base year data and, thus, will not ort the monthly changes indicated by the index numbers. wever, the measure of the monthly trend calculated from the ual value will be biased because the additions which should be ected in all months are only included from the time the rection is made.

rages

average weekly hours figure is obtained by dividing total kly man-hours by the number of wage-earners who worked se hours. Average hourly earnings are obtained by dividing l weekly wages of hourly-rated wage-earners by their total kly hours. Both of these averages apply only to the subset of ge-earners for whom hourly details are reported. It should be d that total hours include overtime hours actually worked that the wage-earners total includes part-time wage-earners casuals working more than seven hours during the survey rence week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. Révision des données

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées sur-le-champ; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication.

2. Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, *earnings and hours, seasonally-adjusted series, January 1961 — December 1971*" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont cau par des mouvements saisonniers, cycliques et irréguliers. Une s désaisonnalisée est une série dont on a éliminé les effets des mou ments saisonniers. Les mouvements saisonniers sont ceux qui s causés par des événements annuels réguliers comme les changem de température, les cycles agricoles, les jours fériés et les vacance convient de noter que la série désaisonnalisée contient des fluctuat irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du *U.S. Bu of the Census* est utilisée pour désaisonnaliser. Ce système perme déceler les mouvements saisonniers, tendanciels et irréguliers au c d'une période de plusieurs années et, à la lumière des mouvem passés, d'estimer les coefficients saisonniers appropriés pour l'a en cours. Sur une base annuelle, toute la série chronologique données désaisonnalisées est révisée à la lumière des renseigne les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désaiso lisés de l'emploi, ainsi que les heures hebdomadaires moyennes gains horaires moyens pour certaines séries statistiques. Vous tr rez d'autres séries désaisonnalisées dans le bulletin *Emploi, rému tion et heures, séries désaisonnalisées, janvier 1961 — décembre* numéro 72-206 au catalogue.

EMPLOYMENT, EARNINGS AND HOURS

EMPLOI, GAINS ET DURÉE DU TRAVAIL

SEPTEMBER - 1978 - SEPTEMBRE

Notice to Data Users

The publications *Review of Employment and Average Weekly Wages and Salaries* (Catalogue 72-201) and *Review of Man-hours and Hourly Earnings* (Catalogue 72-202) have been suspended indefinitely. Their last issue contained "final" estimates for the years 1968, 1969, and 1970.
Effective with 1971 data, statistics contained in the monthly publication *Employment, Earnings and Hours* (Catalogue 72-002) should therefore be considered as "final".

Avis aux utilisateurs

La publication des bulletins *Review of Employment and Average Weekly Wages and Salaries* (nº 72-201 au catalogue) et *Review of Man-Hours and Hourly Earnings* (nº 72-202 au catalogue) a été interrompue pour une période indéterminée. La dernière édition de ces publications présentait les estimations "définitives" pour les années 1968, 1969 et 1970.
A compter du numéro de 1971, les statistiques qui paraissent dans la publication mensuelle *Emploi, gains et durée du travail* (nº 72-002 au catalogue) doivent donc être considérées comme "définitives".

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-carners and salaried employees data are shown separately indicate that representative data for wage-carners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sau contraire) les colonnes laissées en blanc dans le cas des empl ouvriers indiqués séparément, signifient que les données re ouvriers pour lesquels les heures sont enregistrées ne disponibles.

COMMENTARY

First estimates(1) – September 1978
(Seasonally Adjusted)

The first estimates of the Canada industrial composite (2) dex of employment increased by 0.3% over August, 1978. All dustry divisions recorded increases with the exceptions of forestry d mining (including milling) which decreased. All regions regis-ed gains.

Average weekly earnings, at the national industrial composite el, rose by 1.0%. Gains were recorded in all industry divisions and all five regions.

Preliminary Data – August 1978

ployment

Seasonally adjusted, preliminary data for August increased by % in the Canadian industrial composite index of employment. ns were recorded in all industry divisions, excluding construction service which decreased. Quebec, the Prairie region and British umbia registered advances while Ontario and the Atlantic region ined.

ings and Hours

Seasonally adjusted, average weekly earnings rose by 0.8% at national industrial composite level. Most industry divisions icipated in the increase, with the three exceptions of forestry, ng (including milling) and construction, all of which declined.

Unadjusted, average weekly earnings rose by 0.4% to $267.23 e Canadian industrial composite level. Average hourly earnings ased by four cents in both mining (including milling) to $8.71 manufacturing to $6.85, and by seven cents in construction to 14. Average weekly hours increased in manufacturing but de-ed in mining (including milling) and construction.

See note on Statistical Presentation under Concepts and Methods at the back of this publication.
Industrial Composite is the sum for all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – septembre 1978
(Chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries du Canada révèlent une progression de 0.3% d'août à septembre. Exception faite du forestage et des mines (y compris le broyage) qui montrent un recul, toutes les divisions de l'activité économique ont connu des hausses. On a observé des gains dans toutes les régions.

Les gains hebdomadaires moyens au niveau de l'ensemble des industries du Canada ont augmenté de 1.0% d'août à septembre. Des gains furent enregistrés dans toutes les divisions de l'activité économique et dans toutes les régions.

Données provisoires – août 1978

Emploi

Après désaisonnalisation, les données provisoires pour août 1978 montrent une hausse de 0.2% au niveau de l'ensemble des industries du Canada. Toutes les divisions de l'activité économique ont augmenté sauf la construction et les services qui ont affiché une baisse. Le Québec, la région des Prairies et la Colombie-Britannique ont connu des hausses alors que l'Ontario et la région de l'Atlantique montraient un recul.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, se sont accrus de 0.8% au niveau de l'ensemble des industries du Canada. Exception faite du forestage, des mines (y compris le broyage) et de la construction qui ont diminué, toutes les autres divisions de l'activité économique ont contribué à cette hausse générale.

Les gains hebdomadaires moyens, non désaisonnalisés, ont affiché une hausse de 0.4% pour atteindre $267.23 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens se sont accrus de quatre cents dans les mines (y compris le broyage) ($8.71) et les manufactures ($6.85) et de sept cents dans la construction ($10.14). Le nombre moyen d'heures hebdomadaires travaillées s'est élevé dans les manufactures, mais a baissé dans les mines (y compris le broyage) et dans la construction.

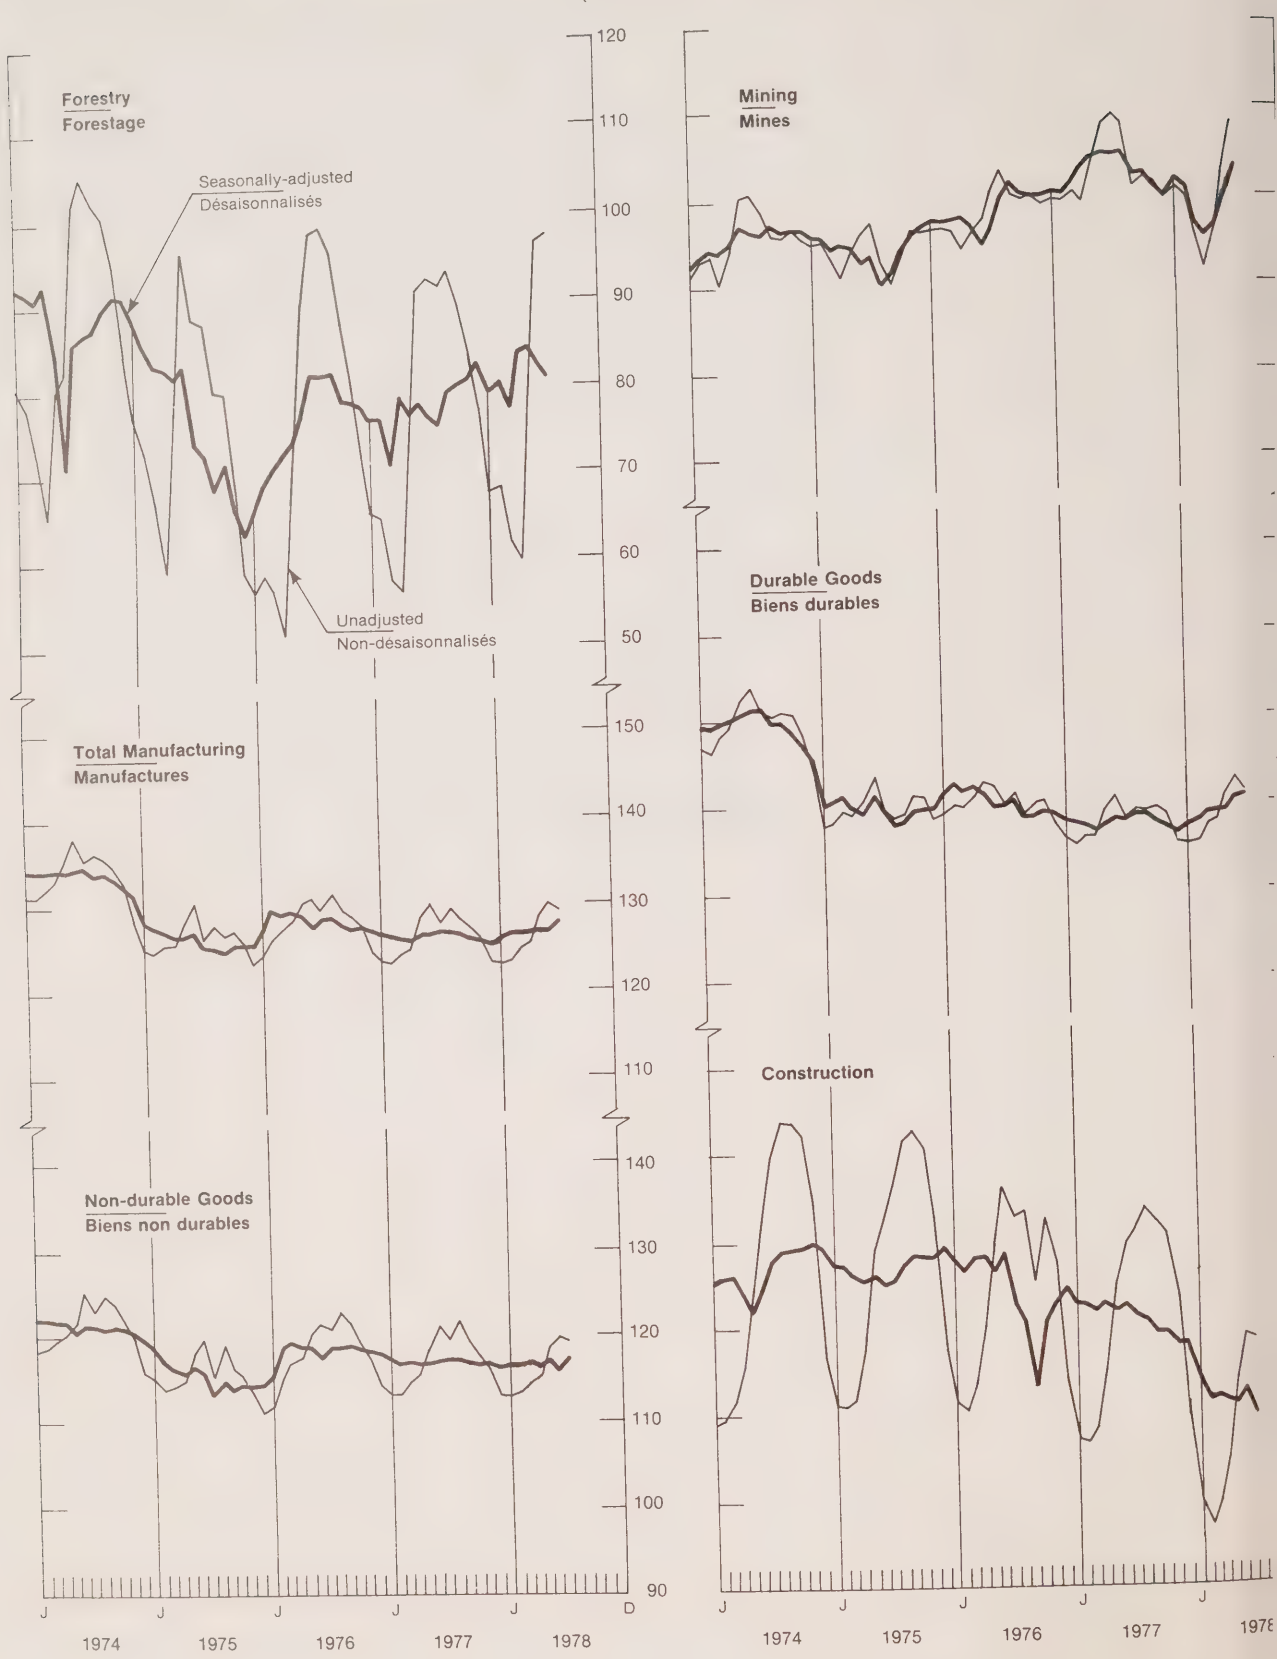

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month – Année et mois	Weekly earnings in current dollars – Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars(1961=100) – Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars – Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars – Indices de la rémunération hebdomadaire en dollars de 1961

D. 1977

On a revisé les données de janvier à juin 1977 pour la Sa wan, la région des Prairies, la Colombie-Britannique et le Can divisions de l'activité économique impliquées sont: la construc transports, communications et autres services publics et l'enser industries. Ces données furent publiées dans l'examplaire de se 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travail mois de janvier à juin 1978 ont été révisées pour toutes les d'activité et toutes les régions géographiques. Les données révi janvier à avril 1978 inclusivement figurent dans *Emploi, gains et travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles et juin 1978 paraissent dans le numéro de juillet 1978 du 72-002.

(1) Les numéros des publications susmentionnées renferment les données disponibles pour toute série donnée. Les données r ces séries figurant dans d'autres numéros de ces publication avoir été rectifiées depuis.

CONCEPTS AND METHODS

ves

The Monthly Employment, Payrolls and Manhours survey is d to measure the month-to-month trends of employment, paid nd earnings for the commercial sector of the economy with the n of agriculture, fishing and trapping.

These measures are expressed in an index form for employ- nd as weekly averages for earnings and hours paid for. The compiled and published at detailed industrial and geographic

of Data

The statistics contained in this report are based on information l through a mail census of "larger firms".

The firm is defined as any business entity whether incorpo- not; it comprises sole proprietorships, partnerships, corpora- d other forms of organization such as co-operatives. Most nsist of only one "establishment" (see definition under l Classification) but in some cases the firm is made up of a of establishments which may or may not be engaged in the d of economic activity.

firm is considered as "larger" when it employs 20 or more in any one month of the year. Although the intent of the to cover all such firms, it also includes some firms with less employees and excludes some firms with more than 20 s; the reason is that, in practice, it is not always possible to promptly enough employment fluctuations in individual

ne universe for the survey is derived from a central file of s maintained by the Business Register and Profiling Division cs Canada.

l commercial industries are covered by the survey, with the of agriculture, fishing and trapping; by definition such nercial sectors as education and related services, health and ervices, religious organizations, private households and ninistration and defense are excluded. Because the survey is "larger firms", the proportion of total employment covered vey varies among industries, provinces and urban areas. The table shows annual employment as reported in the survey ntage of the estimated total number of employees, the latter mated by adding together data from the Employment, nd Manhours survey and data from a sample survey of rms plus supplementary surveys. Estimates of the total f employees are published in "Estimates *of Employees by nd Industry*" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie*" numéro 72-008 au catalogue.

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a s survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enqu l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres en supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services réc commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private hous are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y c l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'esti de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non comme l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont incl l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche économique qui est déterminée en fonction de leur activité prin l'entreprise n'exerce qu'un seul genre d'activité économique, le c est simple. Les problèmes surgissent lorsqu'elle en exerce plus exemple lorsqu'elle possède plus d'un établissement. À des fins st on définit l'établissement, qui consiste habituellement en une mine, un magasin ou une unité semblable, comme la plus pe constituant un ensemble d'exploitation distinct en mesure de déc les éléments de base de la statistique des activités économi permettent de calculer la "valeur ajoutée" ou la "majoration br "bénéfice brut", ainsi que des données sur l'emploi et la rémun

Pour permettre d'obtenir des statistiques géographiques l'établissement est souvent subdivisé en unités déclarantes qu'elles ne puissent fournir toutes les statistiques de base, sont de déclarer des données sur l'emploi et la rémunération pour de particuliers.

The industrial classification of the statistics contained in this is based on the Standard Industrial Classification for 1960. A ption of the various industries and groups of industries is ned in the "Standard Industrial Classification Manual", Cata- No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 pond to the codes of this manual. These tables also contain the ing groupings which are not part of the "Standard *Industrial fication Manual*".

Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).

Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).

Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).

Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).

The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

hic Classification

eporting units are assigned to a province, a county (as by the Census of Population) and, where applicable, to an ea. Data for Newfoundland, Prince Edward Island, Nova nd New Brunswick are aggregated in some tables to give for the Atlantic Region. Similarly, data for Manitoba, ewan and Alberta are added together to provide totals for the Region. The 1966 Census of Population's "Metropolitan finitions were used for the nineteen applicable urban areas; itions used for other urban areas are based on a labour oncept. The urban areas usually consist of the urban centre as ne surrounding territory. A list showing the territory included abulated urban area is available from the Employment and

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. **Employee**

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensionners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procu liste indiquant le territoire compris dans chaque région urbaine dans les tableaux en vous adressant à la Section des statistiques de l et de la rémunération. Les chiffres des unités déclarantes situées aill dans une région urbaine indiquée dans les tableaux ou non attribu comté dont le nom figure sur la liste font partie des totaux prov régionaux et nationaux.

Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept jours du mois de référence. En pratique, étant donné d'entreprises tiennent des registres de paye pour cette période on leur permet de faire porter leur déclaration sur la (les) der période(s) de paye de chaque mois. Lorsque la période de laquelle porte la déclaration dépasse une semaine, on ra données en effectuant le calcul suivant: on divise le nombre d'activité hebdomadaire de l'entreprise par le nombre ouvrables compris dans la période de paye sur laquelle déclaration. Si, en raison d'une grève, d'un jour férié ou facteurs semblables, les données déclarées ne sont pas repré de la période de référence, on procède aux rajustements qui sent afin de traduire fidèlement la situation pendant les sept jours du mois.

2. **Salarié**

Toute personne qui est rétribuée pour ses services ou ses pendant la semaine de référence et pour laquelle l'employeur contributions au R.P.C. ou au R.R.Q. et à la caisse d'as chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps salariés à temps partiel (ceux qui travaillent régulièrement u d'heures inférieur à la semaine normale de travail de l'entr les salariés occasionnels (ceux qui sont embauchés de façon re ou irrégulière et qui ont travaillé au moins sept heures au la période de référence).

Le concept des salariés exclut les propriétaires et les pa d'entreprises non constituées en corporation et ceux qui pos bureau pour l'exercice d'une profession, les travailleurs autor travailleurs familiaux non rémunérés, les bénévoles, les ret travailleurs à domicile, les membres de corps élus ou no personnel militaire et les personnes fournissant des serv établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une pa période de référence mais qui étaient en chômage ou en grèv le reste de la période. Les personnes n'ayant pas touché de la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnell employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillan ment à la production et à des opérations assi particulier le personnel d'entretien, d'entrepôt et d le personnel de sécurité, les chauffeurs-livreurs, le itinérants, les commis des magasins de détail, les s les contremaîtres remplissant des fonctions analog des ouvriers dont ils ont la charge, etc. Toutes ces sont considérées comme des ouvriers, que leurs g fondés sur des taux de rémunération mensuels, h autres. Les salaires hebdomadaires moyens sont ca tous les ouvriers, mais les heures hebdomadaires m les gains horaires moyens sont calculés uniquemen dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

Methodology

The data appearing in this report were collected by means of questionnaires mailed monthly to all firms which employ 20 or more persons in any one month of the year. In order to improve the quality of the response rate is increased through two reminders mailed to non-respondents one month and two months after the original mailing. If the two reminders do not produce a response, the Field Division of Statistics Canada attempts to obtain the required data by telephone or in a personal interview. These steps result in a final response rate of over 80%. Firms for which no response is obtained are accounted for in the employment, earnings and hours tables of the publication. To do this, the unknown figures are replaced by figures based on the behaviour of the reporting unit in the previous month and on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représèntent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. Imputation

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité déclar fournies le mois précédent et de celles fournies par les unités déclaran ressemblent à l'entreprise non répondante sur le plan du classeme activité économique, la taille et le lieu géographique, et qui ont ré pour le mois observé.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canad soigneusement vérifiés à la main et par ordinateur pour assure sont complets, cohérents et exacts. Pour être vérifiées par ordi les réponses sont réparties en groupes d'imputation constit fonction du classement par activité économique, du lieu géogra et de la taille de l'unité déclarante. La composition de ces grou telle qu'ils regroupent des unités déclarantes qui présentent les caractéristiques et dont les caractéristiques affichent les mêm entre elles. Cette vérification permet de comparer la valeur caractéristique (nombre de salariés, heures de travail, ga salarié, rapport du nombre actuel de salariés à celui du mois dent, etc.) par rapport à la valeur de la caractéristique correspo pour tout le groupe d'imputation. L'écart qui peut séparer la d'une caractéristique et la valeur moyenne de la même caracté pour le groupe d'imputation tout entier est calculé séparéme chaque groupe et pour chaque caractéristique, et dépend de l'h néité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour groupe d'imputation, on le remplace par une valeur qui com variance maximum permise par la vérification par ordinateur. pas toujours possible de trouver une valeur qui se situe à l'inté la limite permise par l'ordinateur; si tel est le cas, on rem chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde modification indue d'un chiffre qui était exact au départ. Cela r trop grave si l'on considère que ce procédé mécanique pe déceler efficacement un grand nombre d'erreurs graves con points décimaux mal placés, des erreurs d'inscription des do des problèmes attribuables à une mauvaise interprétation de tions ou des instructions.

2. Imputation

Chaque mois, on reçoit une réponse complète ou partielle de unités déclarantes, alors que d'autres renvoient des questionn sont rejetés à la vérification et qui ne peuvent être corri machine. Une partie ou la totalité des données pour ces unité donc être imputées. Cela signifie que les caractéristiques incor inconnues sont remplacées par des valeurs calculées en d'autres caractéristiques de la même déclaration de l'entrepr déclaration du mois précédent et des caractéristiques d d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclaratio mois. Comme dans le cas de la correction automatique des est possible qu'une valeur exacte au départ soit remplacé autre. Toutefois, il arrive plus souvent qu'un chiffre erron existant soit remplacé par un chiffre plus proche de la valeu fondé sur la déclaration de l'entreprise du mois précédent et d'entreprises qui font partie d'une branche d'activité s appartiennent au même groupe de taille et sont situées dan lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hon une enquête exhaustive, toute inexactitude dans les résultats est à à une erreur d'observation. Parmi les exemples de sources d'observation, citons l'impossibilité d'obtenir des renseignement les unités de l'échantillon, les renseignements inexacts four

ng and processing of the data. Non-sampling errors are difficult easure and no estimates of this type of error have been obtained his survey as yet. However, non-sampling errors have been kept minimum by the use of a carefully designed and carefully worded tionnaire, the relative simplicity of the data requested, follow-up on-respondents, thorough editing of data and control of the essing operations.

stical Presentation

Data Revision

Each month, statistics for three latest months are prepared by the Employment and Payrolls Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usally about 55%) and only highly aggregated figures are released in the Statistics Canada *Daily* and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of course, of higher quality than that of the first estimates because of the higher rate of returns (approximately 75% and 82% respectively). Consequently, full details for both of these months are shown in this publication.

After completion of the third estimate, revisions to the data are made occasionally to incorporate larger corrections originating from late returns and corrected information received from respondents or to rectify mechanical errors. These corrections appear in the tables of this publication.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly - average of the total base year employment (or payroll).

The index numbers constitute a better measure of the monthly trends in statistical series than the actual values because they are not effected by certain statistical changes. For example, a large firm erroneously missing from the survey can be introduced by adjusting both the current and base year data and, thus, will not distort the monthly changes indicated by the index numbers. However, the measure of the monthly trend calculated from the actual value will be biased because the additions which should be reflected in all months are only included from the time the correction is made.

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earners total includes part-time wage-earners and casuals working more than seven hours during the survey reference week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. Révision des données

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on modifié à l'occasion les données à la lumière de révisions plus importantes effectuées pour tenir compte des déclarations des retardataires et des rectifications reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les modifications apportées figurent dans les tableaux de la présente publication.

2. Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, *earnings and hours, seasonally-adjusted series, January 1961 – December 1971*" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont
par des mouvements saisonniers, cycliques et irréguliers. Un
désaisonnalisée est une série dont on a éliminé les effets des
ments saisonniers. Les mouvements saisonniers sont ceux q
causés par des événements annuels réguliers comme les chang
de température, les cycles agricoles, les jours fériés et les vaca
convient de noter que la série désaisonnalisée contient des fluct
irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du *U.S.*
of the Census est utilisée pour désaisonnaliser. Ce système pe
déceler les mouvements saisonniers, tendanciels et irréguliers
d'une période de plusieurs années et, à la lumière des mouv
passés, d'estimer les coefficients saisonniers appropriés pour
en cours. Sur une base annuelle, toute la série chronologi
données désaisonnalisées est révisée à la lumière des renseig
les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices dés
lisés de l'emploi, ainsi que les heures hebdomadaires moyenn
gains horaires moyens pour certaines séries statistiques. Vous
rez d'autres séries désaisonnalisées dans le bulletin *Emploi, ré*
tion et heures, séries désaisonnalisées, janvier 1961 – décemb
numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assure
confidentialité des réponses des entreprises soit respectée.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf ir
contraire) les colonnes laissées en blanc dans le cas des employ
ouvriers indiqués séparément, signifient que les données relat
ouvriers pour lesquels les heures sont enregistrées ne s
disponibles.

COMMENTARY

First Estimates(1) – October 1978 (Seasonally Adjusted)

The first estimates of the Canada industrial composite(2) x of employment for October showed virtually no change (–) from September. Increases were reported in forestry, in finance, ance and real estate and in service; the remaining industry ons reported decreases, with the exception of transportation, nunication and other utilities which remained unchanged. The tic region, Quebec and Prairie region registered gains while s were recorded in the remaining two regions.

Average weekly earnings, at the national industrial composite declined by – 0.2%. Declines were recorded in most industry ons with the exception of mining (including milling), manufac- g and service which increased; losses were registered in all ns but the Atlantic and Prairie regions which increased.

Preliminary Data – September 1978

yment

Seasonally adjusted, preliminary data for September increased % at the Canadian industrial composite index of employment. were registered in manufacturing, in construction, in transpor- communication and other utilities and in service, while losses egistered in the remaining four industry divisions. Gains were ed in the Atlantic and Prairie regions while Ontario showed ly no change and losses were reported in Quebec and British bia.

gs and Hours

Seasonally adjusted, average weekly earnings rose by 1.3% at ional industrial composite level. All industry divisions and all participated in this overall increase.

Unadjusted, average weekly earnings rose by 1.4% to $270.93 Canadian industrial composite level. Average hourly earnings ed by 17 cents in mining (including milling) to $8.87, by 12 n manufacturing to $6.96 and by 32 cents in construction to Average weekly hours increased in mining (including mill- manufacturing and in construction.

: note on Statistical Presentation under Concepts and Methods the back of this publication.

dustrial Composite is the sum for all industries with the ception of agriculture, fishing and trapping, education and ated services, health and welfare services, religious organi- ions, private households and public administration and de- ce. All statistics are based on returns received from employers ving twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – octobre 1978 (chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries(2) du Canada ne révèlent pratiquement aucune variation (– 0.1%) de septembre à octobre. On a enregistré des hausses dans le forestage, dans les finances, assurances et immeuble, et dans les services; exception faite des transports, communications et autres services publics qui sont demeurés inchangés, toutes les autres divisions de l'activité économique ont subi des baisses. On a observé des augmentations pour la région de l'Atlantique, le Québec et la région des Prairies et des baisses pour l'Ontario et la Colombie-Britannique.

Les gains hebdomadaires moyens au niveau de l'ensemble des industries du Canada ont affiché un recul de – 0.2%. Des pertes furent enregistrées dans toutes les divisions de l'activité économique à l'exception des mines (y compris le broyage), des manufactures et des services qui ont connu des hausses. À l'échelle régionale, on a observé des diminutions pour le Québec, l'Ontario et la Colombie-Britannique, et des augmentations pour les régions de l'Atlantique et des Prairies.

Données provisoires - septembre 1978

Emploi

Après désaisonnalisation, les données provisoires pour septembre 1978 montrent une hausse de 0.1% au niveau de l'ensemble des industries du Canada. Les manufactures, la construction, les transports, communications et autres services publics de même que les services ont affiché des hausses, alors que les autres divisions de l'activité économique ont subi des pertes. Les régions de l'Atlantique et des Prairies ont enregistré des gains, l'Ontario n'a pratiquement pas varié, alors que le Québec et la Colombie-Britannique montraient des baisses.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, se sont accrus de 1.3% au niveau de l'ensemble des industries du Canada. Toutes les divisions de l'activité économique et toutes les régions ont participé à cette hausse générale.

Les gains hebdomadaires moyens, non désaisonnalisés, ont affiché une hausse de 1.4% pour atteindre $270.93 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens ont augmenté de 17 cents dans les mines (y compris le broyage) ($8.87), de 12 cents dans les manufactures ($6.96) et de 32 cents dans la construction ($10.50). Le nombre moyen d'heures hebdomadaires travaillées s'est élevé dans les mines (y compris le broyage), dans les manufactures et dans la construction

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.

(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

December - Décembre				

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month — Année et mois	Weekly earnings in current dollars — Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars(1961=100) — Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars — Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars — Indices de la rémunération hebdomadaire en dollars de 1961

STORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

57-1960

Monthly data were not published but are available on st.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67.*

1-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for ays, bridges and streets; engineering; construction; highway idge maintenance; transportation; and transportation, commun and other utilities. Employment, Earnings and Hours, *Cata-72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for ays, bridges and streets; engineering; construction; highway dge maintenance; transportation; and transportation, commu-n and other utilities. *Catalogue 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

: Transportation; Highway and bridge maintenance.

: Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Scotia: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario onto, for scientific and professional equipment; miscellaneous turing industries; non-durable goods; manufacturing; wholesale; trade; industrial composite. *Catalogue 72-002, February*

Average Weekly Hours, Average Hourly Earnings, Average Wages of Hourly-rated Wage-earners 1961-1967 for:

Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967;* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n° *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n° *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1974

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of Catalogue no. 72-002.

E.1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained in "Employment, Earnings and Hours, January – April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la constru l'entretien des routes et des ponts. Voir le n^{O} *72-0 catalogue, juin 1972.*

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les ma rayons, le commerce de détail, le commerce et l'ensemble des in Voir le n^{O} *72-002 au catalogue, juillet 1974.*

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, po ge de femmes, le nombre de salariés, rémunération hebdomadaire mo janvier 1973 à juin 1974, pour Canada et Québec, pour l'entre routes et ponts, transports, transports, communication et autres publics et l'ensemble des industries. Voir le n^{O} *72-002 au ca septembre 1974.*

Nombre d'employés, ensemble des ouvriers, ouvriers (heur rées), rémunération hebdomadaire moyenne des employés, ense ouvriers, heures hebdomadaires– moyennes et rémunération horaire des ouvriers (heures– *déclarées)* de janvier 1973 à juin 1974 pour et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *7 catalogue, septembre 1974.*

D. 1977

On a revisé les données de janvier à juin 1977 pour la Sa wan, la région des Prairies, la Colombie-Britannique et le Ca divisions de l'activité économique impliquées sont: la constru transports, communications et autres services publics et l'ense industries. Ces données furent publiées dans l'examplaire de s 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travai mois de janvier à juin 1978 ont été révisées pour toutes les d'activité et toutes les régions géographiques. Les données révi janvier à avril 1978 inclusivement figurent dans *Emploi, gains e travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles et juin 1978 paraissent dans le numéro de juillet 1978 d 72-002.

(1) Les numéros des publications susmentionnées renferment les données disponibles pour toute série donnée. Les données ces séries figurant dans d'autres numéros de ces publicatio avoir été rectifiées depuis.

CONCEPTS AND METHODS

tives

The Monthly Employment, Payrolls and Manhours survey is ed to measure the month-to-month trends of employment, paid and earnings for the commercial sector of the economy with the on of agriculture, fishing and trapping.

These measures are expressed in an index form for employ- ınd as weekly averages for earnings and hours paid for. The e compiled and published at detailed industrial and geographic

of Data

The statistics contained in this report are based on information d through a mail census of "larger firms".

The firm is defined as any business entity whether incorpo- r not; it comprises sole proprietorships, partnerships, corpora- ıd other forms of organization such as co-operatives. Most onsist of only one "establishment" (see definition under al Classification) but in some cases the firm is made up of a of establishments which may or may not be engaged in the nd of economic activity.

A firm is considered as "larger" when it employs 20 or more in any one month of the year. Although the intent of the s to cover all such firms, it also includes some firms with less employees and excludes some firms with more than 20 es; the reason is that, in practice, it is not always possible to promptly enough employment fluctuations in individual

he universe for the survey is derived from a central file of s maintained by the Business Register and Profiling Division ics Canada.

ll commercial industries are covered by the survey, with the ı of agriculture, fishing and trapping; by definition such nercial sectors as education and related services, health and ervices, religious organizations, private households and ninistration and defense are excluded. Because the survey is "larger firms", the proportion of total employment covered vey varies among industries, provinces and urban areas. The table shows annual employment as reported in the survey ntage of the estimated total number of employees, the latter imated by adding together data from the Employment, nd Manhours survey and data from a sample survey of rms plus supplementary surveys. Estimates of the total f employees are published in "Estimates *of Employees by nd Industry*" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie*" numéro 72-008 au catalogue.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1977 Annual Averages(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a s survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enqué l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres en supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services réc commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private house are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y c l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'esti de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non comme l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclu l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d économique qui est déterminée en fonction de leur activité prin l'entreprise n'exerce qu'un seul genre d'activité économique, le cl est simple. Les problèmes surgissent lorsqu'elle en exerce plus exemple lorsqu'elle possède plus d'un établissement. À des fins sta on définit l'établissement, qui consiste habituellement en une u mine, un magasin ou une unité semblable, comme la plus pe constituant un ensemble d'exploitation distinct en mesure de déc les éléments de base de la statistique des activités économi permettent de calculer la "valeur ajoutée" ou la "majoration br "bénéfice brut", ainsi que des données sur l'emploi et la rémun

Pour permettre d'obtenir des statistiques géographiques l'établissement est souvent subdivisé en unités déclarantes qu'elles ne puissent fournir toutes les statistiques de base, sont de déclarer des données sur l'emploi et la rémunération pour de particuliers.

The industrial classification of the statistics contained in this rt is based on the Standard Industrial Classification for 1960. A ription of the various industries and groups of industries is ined in the "Standard Industrial Classification Manual", Cata- No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 spond to the codes of this manual. These tables also contain the ving groupings which are not part of the "Standard *Industrial ification Manual*".

Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).

Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).

Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).

Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).

The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

hic Classification

Reporting units are assigned to a province, a county (as by the Census of Population) and, where applicable, to an rea. Data for Newfoundland, Prince Edward Island, Nova nd New Brunswick are aggregated in some tables to give for the Atlantic Region. Similarly, data for Manitoba, ewan and Alberta are added together to provide totals for the Region. The 1966 Census of Population's "Metropolitan efinitions were used for the nineteen applicable urban areas; itions used for other urban areas are based on a labour oncept. The urban areas usually consist of the urban centre as e surrounding territory. A list showing the territory included abulated urban area is available from the Employment and

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. **Employee**

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensionners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.
The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procu liste indiquant le territoire compris dans chaque région urbaine dans les tableaux en vous adressant à la Section des statistiques de l et de la rémunération. Les chiffres des unités déclarantes situées aill dans une région urbaine indiquée dans les tableaux ou non attribu comté dont le nom figure sur la liste font partie des totaux prov régionaux et nationaux.

Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept jours du mois de référence. En pratique, étant donné d'entreprises tiennent des registres de paye pour cette période on leur permet de faire porter leur déclaration sur la (les) der période(s) de paye de chaque mois. Lorsque la période de laquelle porte la déclaration dépasse une semaine, on ra données en effectuant le calcul suivant: on divise le nombre d'activité hebdomadaire de l'entreprise par le nombre ouvrables compris dans la période de paye sur laquelle déclaration. Si, en raison d'une grève, d'un jour férié ou facteurs semblables, les données déclarées ne sont pas représ de la période de référence, on procède aux rajustements qui sent afin de traduire fidèlement la situation pendant les sept jours du mois.

2. **Salarié**

Toute personne qui est rétribuée pour ses services ou ses pendant la semaine de référence et pour laquelle l'employeur contributions au R.P.C. ou au R.R.Q. et à la caisse d'as chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps salariés à temps partiel (ceux qui travaillent régulièrement u d'heures inférieur à la semaine normale de travail de l'entr les salariés occasionnels (ceux qui sont embauchés de façon re ou irrégulière et qui ont travaillé au moins sept heures au la période de référence).

Le concept des salariés exclut les propriétaires et les pa d'entreprises non constituées en corporation et ceux qui pos bureau pour l'exercice d'une profession, les travailleurs autor travailleurs familiaux non rémunérés, les bénévoles, les ret travailleurs à domicile, les membres de corps élus ou no personnel militaire et les personnes fournissant des serv établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une pa période de référence mais qui étaient en chômage ou en grèv le reste de la période. Les personnes n'ayant pas touché de la période de référence entière ne sont pas visées.
Les salariés sont classés en deux catégories professionnell employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillan ment à la production et à des opérations assi particulier le personnel d'entretien, d'entrepôt et d le personnel de sécurité, les chauffeurs-livreurs, le itinérants, les commis des magasins de détail, les s les contremaîtres remplissant des fonctions analog des ouvriers dont ils ont la charge, etc. Toutes ces sont considérées comme des ouvriers, que leurs g fondés sur des taux de rémunération mensuels, h autres. Les salaires hebdomadaires moyens sont ca tous les ouvriers, mais les heures hebdomadaires m les gains horaires moyens sont calculés uniquemen dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

rnings

rnings of wage-earners and salaried employees represent gross / for the week, before deductions for taxes, unemployment urance contributions, etc. Gross pay includes salaries, straight e wages, piece-work and regular commission earnings, reg- r paid incentive, cost of living and other bonuses, overtime nings and payments to persons absent with pay in the survey rence week. The payroll concept does not include supplemen- / labour costs such as employers' contributions to unemploy- nt insurance, medical plans, Workmen's Compensation and er welfare plans, nor does it include the cost of equipment, the ue of room and board, compensation in kind, travelling enses, retirement gratuities, bonuses paid at irregular and equent intervals or directors' fees.

term "earnings" is used to denote the total of weekly wages he wage-earners and salaries of the salaried employees. The lications prior to March 1971 contained these data combined er "Average Weekly Wages and Salaries". These data are parable with "Average Weekly Earnings" of total employ- n the present publication. The system now provides separate ings data for all wage-earners and salaried employees reas formerly only "Average Weekly Wages" for hourly- d wage-earners were available.

Absence

absence comprises paid holidays, vacation, sick leave ding industrial injury and personal leave such as avement leave, jury duty, etc.

dard Work Week

standard work week is the number of hours or days of work ally scheduled for the majority of full-time employees.

ogy

e data appearing in this report were collected by means of iires mailed monthly to all firms which employ 20 or more any one month of the year. In order to improve the quality e response rate is increased through two reminders mailed respondents one month and two months after the original f the two reminders do not produce a response, the Field f Statistics Canada attempts to obtain the required data by or in a personal interview. These steps result in a final ite of over 80%. Firms for which no response is obtained are nted for in the employment, earnings and hours tables of ation. To do this, the unknown figures are replaced by ed on the behaviour of the reporting unit in the previous on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. Imputation

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité déclar fournies le mois précédent et de celles fournies par les unités déclarant ressemblent à l'entreprise non répondante sur le plan du classeme activité économique, la taille et le lieu géographique, et qui ont ré pour le mois observé.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canad soigneusement vérifiés à la main et par ordinateur pour assurer sont complets, cohérents et exacts. Pour être vérifiées par ordi les réponses sont réparties en groupes d'imputation constitu fonction du classement par activité économique, du lieu géogra et de la taille de l'unité déclarante. La composition de ces grou telle qu'ils regroupent des unités déclarantes qui présentent les caractéristiques et dont les caractéristiques affichent les mêm entre elles. Cette vérification permet de comparer la valeur caractéristique (nombre de salariés, heures de travail, ga salarié, rapport du nombre actuel de salariés à celui du mois dent, etc.) par rapport à la valeur de la caractéristique corresp pour tout le groupe d'imputation. L'écart qui peut séparer la d'une caractéristique et la valeur moyenne de la même caract pour le groupe d'imputation tout entier est calculé séparém chaque groupe et pour chaque caractéristique, et dépend de l'h néité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour groupe d'imputation, on le remplace par une valeur qui com variance maximum permise par la vérification par ordinateur. pas toujours possible de trouver une valeur qui se situe à l'int la limite permise par l'ordinateur; si tel est le cas, on rem chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde modification indue d'un chiffre qui était exact au départ. Cela trop grave si l'on considère que ce procédé mécanique pe déceler efficacement un grand nombre d'erreurs graves co points décimaux mal placés, des erreurs d'inscription des do des problèmes attribuables à une mauvaise interprétation de tions ou des instructions.

2. Imputation

Chaque mois, on reçoit une réponse complète ou partielle de unités déclarantes, alors que d'autres renvoient des questionn sont rejetés à la vérification et qui ne peuvent être corri machine. Une partie ou la totalité des données pour ces unité donc être imputées. Cela signifie que les caractéristiques incor inconnues sont remplacées par des valeurs calculées en d'autres caractéristiques de la même déclaration de l'entrepr déclaration du mois précédent et des caractéristiques d d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclaration mois. Comme dans le cas de la correction automatique des est possible qu'une valeur exacte au départ soit remplacée autre. Toutefois, il arrive plus souvent qu'un chiffre erron existant soit remplacé par un chiffre plus proche de la valeu fondé sur la déclaration de l'entreprise du mois précédent et d'entreprises qui font partie d'une branche d'activité s appartiennent au même groupe de taille et sont situées dans lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hom une enquête exhaustive, toute inexactitude dans les résultats est a à une erreur d'observation. Parmi les exemples de sources d'observation, citons l'impossibilité d'obtenir des renseignement les unités de l'échantillon, les renseignements inexacts fourn

g and processing of the data. Non-sampling errors are difficult asure and no estimates of this type of error have been obtained s survey as yet. However, non-sampling errors have been kept inimum by the use of a carefully designed and carefully worded onnaire, the relative simplicity of the data requested, follow-up n-respondents, thorough editing of data and control of the sing operations.

ical Presentation

ata Revision

ach month, statistics for three latest months are prepared by the mployment and Payrolls Section. Data for the first, most rrent month, are entitled first estimates. They are based on a nited number of returns (usally about 55%) and only highly gregated figures are released in the Statistics Canada *Daily* and e First Estimates table of this publication. Simultaneously, cond estimates are prepared for the month immediately pre-ding the most current data and third estimates for the month ior to that. Both of these latter estimates are of course, of gher quality than that of the first estimates because of the gher rate of returns (approximately 75% and 82% respectively). onsequently, full details for both of these months are shown in s publication.

ter completion of the third estimate, revisions to the data are de occasionally to incorporate larger corrections originating m late returns and corrected information received from pondents or to rectify mechanical errors. Thèse corrections pear in the tables of this publication.

dex Numbers

dex numbers are calculated by dividing the current month's ployment (or payroll) by the monthly - average of the total e year employment (or payroll).

e index numbers constitute a better measure of the monthly nds in statistical series than the actual values because they are effected by certain statistical changes. For example, a large n erroneously missing from the survey can be introduced by usting both the current and base year data and, thus, will not ort the monthly changes indicated by the index numbers. wever, the measure of the monthly trend calculated from the ual value will be biased because the additions which should be ected in all months are only included from the time the rection is made.

rages

average weekly hours figure is obtained by dividing total kly man-hours by the number of wage-earners who worked e hours. Average hourly earnings are obtained by dividing l weekly wages of hourly-rated wage-earners by their total kly hours. Both of these averages apply only to the subset of e-earners for whom hourly details are reported. It should be d that total hours include overtime hours actually worked that the wage-earners total includes part-time wage-earners casuals working more than seven hours during the survey rence week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. Révision des données

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on modifié à l'occasion les données à la lumière de révisions plus importantes effectuées pour tenir compte des déclarations des retardataires et des rectifications reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les modifications apportées figurent dans les tableaux de la présente publication.

2. Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, *earnings and hours, seasonally-adjusted series, January 1961 – December 1971*" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont c par des mouvements saisonniers, cycliques et irréguliers. Un désaisonnalisée est une série dont on a éliminé les effets des m ments saisonniers. Les mouvements saisonniers sont ceux qu causés par des événements annuels réguliers comme les chang de température, les cycles agricoles, les jours fériés et les vaca convient de noter que la série désaisonnalisée contient des fluct irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du *U.S. of the Census* est utilisée pour désaisonnaliser. Ce système per déceler les mouvements saisonniers, tendanciels et irréguliers a d'une période de plusieurs années et, à la lumière des mouv passés, d'estimer les coefficients saisonniers appropriés pour en cours. Sur une base annuelle, toute la série chronologiq données désaisonnalisées est révisée à la lumière des renseign les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désa lisés de l'emploi, ainsi que les heures hebdomadaires moyenn gains horaires moyens pour certaines séries statistiques. Vous rez d'autres séries désaisonnalisées dans le bulletin *Emploi, ré tion et heures, séries désaisonnalisées, janvier 1961 – décembr* numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assure confidentialité des réponses des entreprises soit respectée.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf in contraire) les colonnes laissées en blanc dans le cas des employé ouvriers indiqués séparément, signifient que les données relati ouvriers pour lesquels les heures sont enregistrées ne so disponibles.

COMMENTARY

First Estimates(1) – November 1978 (Seasonally Adjusted)

The first estimates of the Canada industrial composite(2) ex of employment for November indicated a 0.3% rise from ober. Increases were reported at all major industry levels, except ing (including milling) and construction which declined, and at all on levels except British Columbia which decreased.

Average weekly earnings, at the national industrial composite l rose by 0.8%. All industry divisions, except construction which ined, reported increases as did all regions.

Preliminary Data – October 1978

loyment

Seasonally adjusted, preliminary data for October showed ally no change (- 0.1%) at the Canadian industrial composite of employment. Gains in forestry, manufacturing and service mostly offset by losses in the remaining industry divisions. ec, Ontario and the Prairie region showed increases while the tic region and British Columbia declined.

gs and Hours

Seasonally adjusted, average weekly earnings reported a e of 0.2% at the national industrial composite level. Losses were offset by gains in mining (including milling), in manufacturing, de and in service. Quebec, Ontario and British Columbia ed losses while the remaining two regions gained.

Unadjusted, average weekly earnings rose by 0.4% to $272.01 Canadian industrial composite level. Average hourly earnings ed by 29 cents in mining (including milling) to $9.11, by four manufacturing to $7.01, and by three cents in construction to Average weekly hours increased in mining (including milling) ed unchanged in manufacturing and declined in construction.

note on Statistical Presentation under Concepts and Methods the back of this publication.
dustrial Composite is the sum for all industries with the ception of agriculture, fishing and trapping, education and ated services, health and welfare services, religious organi- ions, private households and public administration and de- ce. All statistics are based on returns received from employers ving twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – novembre 1978 (Chiffres désonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries du Canada(2) révèlent une progression de 0.3% d'octobre à novembre. Toutes les divisions de l'activité économique ont connu des hausses à l'exception des mines (y compris le broyage) et de la construction qui montrent un recul. On a observé des gains dans toutes les régions sauf en Colombie-Britannique qui a accusé des pertes.

Les gains hebdomadaires moyens au niveau de l'ensemble des industries du Canada ont augmenté de 0.8%. Exception faite de la construction qui a subi des pertes, des gains furent enregistrés dans toutes les divisions de l'activité économique et dans toutes les régions.

Données provisoires – octobre 1978

Emploi

Après désaisonnalisation, les données provisoires pour octobre 1978 montrent un fléchissement de 0.1% au niveau de l'ensemble des industries du Canada. Les gains dans le forestage, les manufactures et les services furent pratiquement annulés par les pertes subies dans les autres divisions de l'activité économique. Le Québec, l'Ontario et la région des Prairies ont connu des hausses alors que la région de l'Atlantique et la Colombie-Britannique montraient un recul.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, ont diminué de 0.2% au niveau de l'ensemble des industries du Canada. Les pertes furent presque contrebalancées par les gains dans les mines (y compris le broyage), les manufactures, le commerce et les services. Le Québec, l'Ontario et la Colombie-Britannique ont enregistré des pertes alors que les régions de l'Atlantique et des Prairies ont connu des hausses.

Les gains hebdomadaires moyens, non désaisonnalisés, ont affiché une hausse de 0.4% pour atteindre $272.01 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens se sont accrus de 29 cents dans les mines (y compris le broyage) (9.11), de quatre cents dans les manufactures ($7.01) et de trois cents dans la construction ($10.53). Le nombre moyen d'heures hebdomadaires travaillées s'est élevé dans les mines (y compris le broyage), n'a pas changé dans les manufactures et a baissé dans la construction.

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month – Année et mois	Weekly earnings in current dollars – Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars(1961=100) – Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars – Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars – Indices de la rémunération hebdomadaire en dollars de 1961

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunerations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au debut du mois. La moyenne des remunerations hebdomadaires courantes pour un mois quelconque est donc rectifiee, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice etant plus près de la période au cours de laquelle les remunerations sont depensees. 2. Voir le detail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses elements dans la publication mensuelle "Prix et indices des prix" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

ISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

957-1960

Monthly data were not published but are available on est.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67.*

961-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for ways, bridges and streets; engineering; construction; highway ridge maintenance; transportation; and transportation, commu-ion and other utilities. Employment, Earnings and Hours, *Cata-72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for ways, bridges and streets; engineering; construction; highway ridge maintenance; transportation; and transportation, commu-on and other utilities. *Catalogue 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

da: Transportation; Highway and bridge maintenance.

tic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Scotia: Transportation, communication and other utilities; Transportation.

ec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario oronto, for scientific and professional equipment; miscellaneous facturing industries; non-durable goods; manufacturing; whole-rade; trade; industrial composite. *Catalogue 72-002, February*

Average Weekly Hours, Average Hourly Earnings, Average y Wages of Hourly-rated Wage-earners 1961-1967 for:

la: Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n^{O} 72-201 au catalogue, 1957-1967;* Review of Man Hours and Hourly Earnings, *n^{O} 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n^{O} *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n^{O} *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n^{O} 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1974

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of Catalogue no. 72-002.

E.1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained in "Employment, Earnings and Hours, January – April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la construc l'entretien des routes et des ponts. Voir le n^{O} *72-00 catalogue, juin 1972.*

Heures hebdomadaires moyennes, rémunération horaire moy gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlan - Québec - pour l'entretien des routes et des ponts - n^{O} *72-002 au catal décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Av Weekly Hours and Average Hourly Earnings, Monthly and A Statistics, January 1961 - May 1965, n^{O} 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pub pour 1965 figurent dans les n^{OS} *72-201* et *72-202* au catal *1957-1967.*

Toutes les autres données mensuelles et annuelles disponibles publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1966-1968.*

Toutes les autres données mensuelles et annuelles disponibles pour sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1967-19*

Toutes les autres données mensuelles et annuelles disponibles po période 1968-1970 sont publiées dans les n^{OS} *72-201* et *72-20* catalogue, *1968-1970.*

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973, Ca Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les maga rayons, le commerce de détail, le commerce et l'ensemble des indu Voir le n^{O} *72-002 au catalogue, juillet 1974.*

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pour ge de femmes, le nombre de salariés, rémunération hebdomadaire moyen janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretie routes et ponts, transports, transports, communication et autres se publics et l'ensemble des industries. Voir le n^{O} *72-002 au cata septembre 1974.*

Nombre d'employés, ensemble des ouvriers, ouvriers (heures rées), rémunération hebdomadaire moyenne des employés, ensemb ouvriers, heures hebdomadaires– moyennes et rémunération horaire mo des ouvriers (heures– *déclarées)* de janvier 1973 à juin 1974 pour C et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72-0 catalogue, septembre 1974.*

D. 1977

On a revisé les données de janvier à juin 1977 pour la Sask wan, la région des Prairies, la Colombie-Britannique et le Canac divisions de l'activité économique impliquées sont: la constructio transports, communications et autres services publics et l'ensemb industries. Ces données furent publiées dans l'examplaire de sept 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travail p mois de janvier à juin 1978 ont été révisées pour toutes les br d'activité et toutes les régions géographiques. Les données révisée janvier à avril 1978 inclusivement figurent dans *Emploi, gains et du travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles po et juin 1978 paraissent dans le numéro de juillet 1978 du b 72-002.

(1) Les numéros des publications susmentionnées renferment les de données disponibles pour toute série donnée. Les données rela ces séries figurant dans d'autres numéros de ces publications p avoir été rectifiées depuis.

CONCEPTS AND METHODS

ectives

The Monthly Employment, Payrolls and Manhours survey is gned to measure the month-to-month trends of employment, paid rs and earnings for the commercial sector of the economy with the usion of agriculture, fishing and trapping.

These measures are expressed in an index form for employ- t and as weekly averages for earnings and hours paid for. The are compiled and published at detailed industrial and geographic s.

rce of Data

The statistics contained in this report are based on information ined through a mail census of "larger firms".

The firm is defined as any business entity whether incorpo- or not; it comprises sole proprietorships, partnerships, corpora- and other forms of organization such as co-operatives. Most consist of only one "establishment" (see definition under strial Classification) but in some cases the firm is made up of a ber of establishments which may or may not be engaged in the kind of economic activity.

A firm is considered as "larger" when it employs 20 or more ns in any one month of the year. Although the intent of the y is to cover all such firms, it also includes some firms with less 20 employees and excludes some firms with more than 20 oyees; the reason is that, in practice, it is not always possible to re promptly enough employment fluctuations in individual

rse

The universe for the survey is derived from a central file of oyers maintained by the Business Register and Profiling Division tistics Canada.

age

All commercial industries are covered by the survey, with the tion of agriculture, fishing and trapping; by definition such mmercial sectors as education and related services, health and re services, religious organizations, private households and administration and defense are excluded. Because the survey is d to "larger firms", the proportion of total employment covered survey varies among industries, provinces and urban areas. The ing table shows annual employment as reported in the survey rcentage of the estimated total number of employees, the latter estimated by adding together data from the Employment, ls and Manhours survey and data from a sample survey of r firms plus supplementary surveys. Estimates of the total r of employees are published in "Estimates *of Employees by ce and Industry*" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie*" numéro 72-008 au catalogue.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1977 Annual Averages(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sar survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enqu supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréa commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private household are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y com l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estima de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerci l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not pa the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'a économique qui est déterminée en fonction de leur activité princip l'entreprise n'exerce qu'un seul genre d'activité économique, le clas est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'u exemple lorsqu'elle possède plus d'un établissement. À des fins statis on définit l'établissement, qui consiste habituellement en une usi mine, un magasin ou une unité semblable, comme la plus petit constituant un ensemble d'exploitation distinct en mesure de déclar les éléments de base de la statistique des activités économiqu permettent de calculer la "valeur ajoutée" ou la "majoration brute "bénéfice brut", ainsi que des données sur l'emploi et la rémunéra

Pour permettre d'obtenir des statistiques géographiques dé l'établissement est souvent subdivisé en unités déclarantes qu qu'elles ne puissent fournir toutes les statistiques de base, sont en de déclarer des données sur l'emploi et la rémunération pour des e particuliers.

The industrial classification of the statistics contained in this ort is based on the Standard Industrial Classification for 1960. A cription of the various industries and groups of industries is tained in the "Standard Industrial Classification Manual", Cata- ie No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 espond to the codes of this manual. These tables also contain the wing groupings which are not part of the "Standard *Industrial sification Manual*".

) Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

) Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).

) Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).

) Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).

Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).

The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

aphic Classification

Reporting units are assigned to a province, a county (as d by the Census of Population) and, where applicable, to an area. Data for Newfoundland, Prince Edward Island, Nova and New Brunswick are aggregated in some tables to give es for the Atlantic Region. Similarly, data for Manitoba, chewan and Alberta are added together to provide totals for the Region. The 1966 Census of Population's "Metropolitan definitions were used for the nineteen applicable urban areas; finitions used for other urban areas are based on a labour concept. The urban areas usually consist of the urban centre as the surrounding territory. A list showing the territory included tabulated urban area is available from the Employment and

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. **Employee**

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensionners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procure liste indiquant le territoire compris dans chaque région urbaine fig dans les tableaux en vous adressant à la Section des statistiques de l'e et de la rémunération. Les chiffres des unités déclarantes situées ailleu dans une région urbaine indiquée dans les tableaux ou non attribuée comté dont le nom figure sur la liste font partie des totaux provin régionaux et nationaux.

Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept de jours du mois de référence. En pratique, étant donné qu d'entreprises tiennent des registres de paye pour cette période p on leur permet de faire porter leur déclaration sur la (les) derni période(s) de paye de chaque mois. Lorsque la période de pa laquelle porte la déclaration dépasse une semaine, on raju données en effectuant le calcul suivant: on divise le nombre de d'activité hebdomadaire de l'entreprise par le nombre de ouvrables compris dans la période de paye sur laquelle po déclaration. Si, en raison d'une grève, d'un jour férié ou d' facteurs semblables, les données déclarées ne sont pas représen de la période de référence, on procède aux rajustements qui s sent afin de traduire fidèlement la situation pendant les sept de jours du mois.

2. **Salarié**

Toute personne qui est rétribuée pour ses services ou ses ab pendant la semaine de référence et pour laquelle l'employeur ve contributions au R.P.C. ou au R.R.Q. et à la caisse d'assu chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps ple salariés à temps partiel (ceux qui travaillent régulièrement un n d'heures inférieur à la semaine normale de travail de l'entrep les salariés occasionnels (ceux qui sont embauchés de façon ten re ou irrégulière et qui ont travaillé au moins sept heures au c la période de référence).

Le concept des salariés exclut les propriétaires et les part d'entreprises non constituées en corporation et ceux qui possè bureau pour l'exercice d'une profession, les travailleurs autono travailleurs familiaux non rémunérés, les bénévoles, les retra travailleurs à domicile, les membres de corps élus ou nom personnel militaire et les personnes fournissant des servic établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une part période de référence mais qui étaient en chômage ou en grève p le reste de la période. Les personnes n'ayant pas touché de pa la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillant e ment à la production et à des opérations assimil particulier le personnel d'entretien, d'entrepôt et de li le personnel de sécurité, les chauffeurs-livreurs, les v itinérants, les commis des magasins de détail, les serv les contremaîtres remplissant des fonctions analogues des ouvriers dont ils ont la charge, etc. Toutes ces p sont considérées comme des ouvriers, que leurs gair fondés sur des taux de rémunération mensuels, hor autres. Les salaires hebdomadaires moyens sont calcu tous les ouvriers, mais les heures hebdomadaires moy les gains horaires moyens sont calculés uniquement p dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

odology

The data appearing in this report were collected by means of onnaires mailed monthly to all firms which employ 20 or more ns in any one month of the year. In order to improve the quality a, the response rate is increased through two reminders mailed non-respondents one month and two months after the original ut. If the two reminders do not produce a response, the Field on of Statistics Canada attempts to obtain the required data by one or in a personal interview. These steps result in a final nse rate of over 80%. Firms for which no response is obtained are ccounted for in the employment, earnings and hours tables of ublication. To do this, the unknown figures are replaced by based on the behaviour of the reporting unit in the previous and on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. Imputation

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité décla fournies le mois précédent et de celles fournies par les unités déclara ressemblent à l'entreprise non répondante sur le plan du classem activité économique, la taille et le lieu géographique, et qui ont r pour le mois observé.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Cana soigneusement vérifiés à la main et par ordinateur pour assure sont complets, cohérents et exacts. Pour être vérifiées par ordi les réponses sont réparties en groupes d'imputation consti fonction du classement par activité économique, du lieu géogra et de la taille de l'unité déclarante. La composition de ces gro telle qu'ils regroupent des unités déclarantes qui présentent les caractéristiques et dont les caractéristiques affichent les mêm entre elles. Cette vérification permet de comparer la valeu caractéristique (nombre de salariés, heures de travail, ga salarié, rapport du nombre actuel de salariés à celui du mois dent, etc.) par rapport à la valeur de la caractéristique corresp pour tout le groupe d'imputation. L'écart qui peut séparer l d'une caractéristique et la valeur moyenne de la même caracté pour le groupe d'imputation tout entier est calculé séparéme chaque groupe et pour chaque caractéristique, et dépend de l'h néité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour groupe d'imputation, on le remplace par une valeur qui com variance maximum permise par la vérification par ordinateur. pas toujours possible de trouver une valeur qui se situe à l'inté la limite permise par l'ordinateur; si tel est le cas, on rem chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde modification indue d'un chiffre qui était exact au départ. Cela trop grave si l'on considère que ce procédé mécanique pe déceler efficacement un grand nombre d'erreurs graves con points décimaux mal placés, des erreurs d'inscription des do des problèmes attribuables à une mauvaise interprétation de tions ou des instructions.

2. Imputation

Chaque mois, on reçoit une réponse complète ou partielle de unités déclarantes, alors que d'autres renvoient des questionn sont rejetés à la vérification et qui ne peuvent être corri machine. Une partie ou la totalité des données pour ces unités donc être imputées. Cela signifie que les caractéristiques incor inconnues sont remplacées par des valeurs calculées en d'autres caractéristiques de la même déclaration de l'entrepri déclaration du mois précédent et des caractéristiques du d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclaration mois. Comme dans le cas de la correction automatique des e est possible qu'une valeur exacte au départ soit remplacée autre. Toutefois, il arrive plus souvent qu'un chiffre erroné existant soit remplacé par un chiffre plus proche de la valeur fondé sur la déclaration de l'entreprise du mois précédent et d'entreprises qui font partie d'une branche d'activité se appartiennent au même groupe de taille et sont situées dans lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hom une enquête exhaustive, toute inexactitude dans les résultats est at à une erreur d'observation. Parmi les exemples de sources d'observation, citons l'impossibilité d'obtenir des renseignements les unités de l'échantillon, les renseignements inexacts fourni

ing and processing of the data. Non-sampling errors are difficult neasure and no estimates of this type of error have been obtained this survey as yet. However, non-sampling errors have been kept minimum by the use of a carefully designed and carefully worded stionnaire, the relative simplicity of the data requested, follow-up ion-respondents, thorough editing of data and control of the essing operations.

istical Presentation

Data Revision

Each month, statistics for three latest months are prepared by the Employment and Payrolls Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usally about 55%) and only highly aggregated figures are released in the Statistics Canada *Daily* and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of course, of higher quality than that of the first estimates because of the higher rate of returns (approximately 75% and 82% respectively). Consequently, full details for both of these months are shown in this publication.

After completion of the third estimate, revisions to the data are made occasionally to incorporate larger corrections originating from late returns and corrected information received from respondents or to rectify mechanical errors. These corrections appear in the tables of this publication.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly - average of the total base year employment (or payroll).

The index numbers constitute a better measure of the monthly trends in statistical series than the actual values because they are not effected by certain statistical changes. For example, a large firm erroneously missing from the survey can be introduced by adjusting both the current and base year data and, thus, will not distort the monthly changes indicated by the index numbers. However, the measure of the monthly trend calculated from the actual value will be biased because the additions which should be reflected in all months are only included from the time the correction is made.

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked hose hours. Average hourly earnings are obtained by dividing otal weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be oted that total hours include overtime hours actually worked nd that the wage-earners total includes part-time wage-earners nd casuals working more than seven hours during the survey eference week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. Révision des données

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on modifié à l'occasion les données à la lumière de révisions plus importantes effectuées pour tenir compte des déclarations des retardataires et des rectifications reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les modifications apportées figurent dans les tableaux de la présente publication.

2. Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, *earnings and hours, seasonally-adjusted series, January 1961 – December 1971*" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont caus par des mouvements saisonniers, cycliques et irréguliers. Une s désaisonnalisée est une série dont on a éliminé les effets des mou ments saisonniers. Les mouvements saisonniers sont ceux qui s causés par des événements annuels réguliers comme les changeme de température, les cycles agricoles, les jours fériés et les vacance convient de noter que la série désaisonnalisée contient des fluctuati irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du *U.S. Bur of the Census* est utilisée pour désaisonnaliser. Ce système permet déceler les mouvements saisonniers, tendanciels et irréguliers au co d'une période de plusieurs années et, à la lumière des mouveme passés, d'estimer les coefficients saisonniers appropriés pour l'an en cours. Sur une base annuelle, toute la série chronologique données désaisonnalisées est révisée à la lumière des renseigneme les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désaison lisés de l'emploi, ainsi que les heures hebdomadaires moyennes et gains horaires moyens pour certaines séries statistiques. Vous trou rez d'autres séries désaisonnalisées dans le bulletin *Emploi, rémun tion et heures, séries désaisonnalisées, janvier 1961 – décembre 19* numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer qu confidentialité des réponses des entreprises soit respectée.

Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Distribution, Statistics Canada, Ottawa, K1A 0T6, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Employment and Payrolls Section,
Labour Division,

Statistics Canada, Ottawa, K1A 0V2 (telephone: 992-5613) or to a local office of the bureau's User Advisory Services Division:

St. John's (Nfld.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1-800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Distribution des publications, Statistique Canada, Ottawa, K1A 0T6, ou à Imprimerie et édition, Approvisionnements et services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des statistiques de l'emploi et de la rémunération,
Division du travail,

Statistique Canada, Ottawa, K1A 0V2 (téléphone: 992-5613) ou à un bureau local de la Division de l'assistance-utilisateurs situé aux endroits suivants:

St. John's (T.-N.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1-800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indica contraire) les colonnes laissées en blanc dans le cas des employés e ouvriers indiqués séparément, signifient que les données relatives ouvriers pour lesquels les heures sont enregistrées ne sont disponibles.

COMMENTARY

First Estimates(1) – December 1978
(Seasonally Adjusted)

The first estimates of the Canada industrial composite(2) ex of employment for December increased by 0.5% over Novem- 1978. All industry divisions recorded increases with the exception ining (including milling) which decreased. All regions registered s except British Columbia which recorded a decrease.

Average weekly earnings, at the national industrial composite l, rose by 0.6%. Gains were recorded in most industry divisions the exceptions of forestry, transportation, communication and r utilities and trade which registered decreases; increases were registered in all regions.

Preliminary Data – November 1978

loyment

Seasonally adjusted, preliminary data for November increased .2% at the Canadian industrial composite index of employment. ng (including milling), construction and service registered eases while the remaining industry divisions increased with the otion of forestry which remained unchanged. All regions regis- gains with the exceptions of Quebec which remained unchanged British Columbia which decreased.

ings and Hours

Seasonally adjusted, average weekly earnings rose by 1.2% at ational industrial composite level. Gains were recorded in all try divisions and in all five regions.

Unadjusted, average weekly earnings rose by 0.5% to $273.01 Canadian industrial composite level. Average hourly earnings sed by 7 cents in mining (including milling) to $9.17, by 3 cents nufacturing to $7.04 and by 12 cents in construction to $10.66. ge weekly hours increased in mining (including milling) and facturing but decreased in construction.

---

ee note on Statistical Presentation under Concepts and Methods t the back of this publication.
ndustrial Composite is the sum for all industries with the xception of agriculture, fishing and trapping, education and elated services, health and welfare services, religious organi- ations, private households and public administration and de- nce. All statistics are based on returns received from employers aving twenty or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – décembre 1978
(Chiffres désaisonnalisés)

Les premières estimations de l'emploi pour l'ensemble des industries(2) du Canada révèlent une progression de 0.5% de novembre à décembre. Exception faite des mines (y compris le broyage) qui montrent un recul, toutes les divisions de l'activité économique ont connu des hausses. On a observé des gains dans toutes les régions sauf en Colombie-Britannique qui a enregistré une baisse.

Les gains hebdomadaires moyens au niveau de l'ensemble des industries du Canada ont augmenté de 0.6% de novembre à décembre. Des hausses furent enregistrées dans toutes les divisions de l'activité économique à l'exception du forestage, des transports, communications et autres services publics et du commerce qui ont connu des pertes. Toutes les régions ont participé à la hausse générale.

Données provisoires – Novembre 1978

Emploi

Après désaisonnalisation, les données provisoires pour novembre 1978 montrent une hausse de 0.2% au niveau de l'ensemble des industries du Canada. Les mines (y compris le broyage), la construction et les services ont subi des pertes alors que les autres divisions de l'activité économique ont affiché des hausses exception faite du forestage qui n'a pas varié. Toutes les régions ont enregistré des gains à l'exception du Québec qui n'a pas varié et de la Colombie-Britannique qui a affiché des baisses.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, se sont accrus de 1.2% au niveau de l'ensemble des industries du Canada. Toutes les divisions de l'activité économique et toutes les régions ont participé à cette hausse.

Les gains hebdomadaires moyens, non désaisonnalisés, ont affiché une hausse de 0.5% pour atteindre $273.01 au niveau de l'ensemble des industries du Canada. Les gains horaires moyens ont augmenté de 7 cents dans les mines (y compris le broyage) ($9.17), de 3 cents dans les manufactures ($7.04) et de 12 cents dans la construction ($10.66). Le nombre moyen d'heures hebdomadaires travaillées s'est élevé dans les mines (y compris le broyage) et dans les manufactures mais a diminué dans la construction.

---

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
(2) L'ensemble des industries comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt salariés au cours d'un mois quelconque de l'année.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relates to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

TABLE 18. Average Hourly Earnings of Hourly-rated Wage-earners, Seasonally-adjusted and Unadjusted, Selected Series for Canada - Continued

TABLEAU 18. Rémunération horaire moyenne désaisonnalisée et non désaisonnalisée des ouvriers (heures déclarées), certaines séries, Canada - suite

Year - Année	J	F	M	A	M	J	J	A	S	O	N	D	Average - Moyenne
Transportation equipment - Matériel de transport:													
unadjusted - non désaisonnalisé													
1975	5.44	5.54	5.59	5.67	5.75	5.82	5.84	5.86	5.98	6.12	6.11	6.14	5.82
1976	6.32	6.41	6.41	6.52	6.58	6.72	6.61	6.67	6.62	6.71	6.80	6.87	6.60
1977	7.09	7.16	7.18	7.19	7.25	7.16	7.18	7.28	7.59	7.66	7.64	7.64	7.34
1978	7.53	7.64	7.66	7.71	7.74	7.85	7.76	7.79	8.17	8.15			
Electrical products - Appareils et matériel électriques:													
unadjusted - non désaisonnalisé													
1975	4.41	4.43	4.53	4.60	4.69	4.72	4.75	4.78	4.84	4.85	4.89	4.90	4.70
1976	4.98	5,05	5.11	5.10	5.22	5.31	5.30	5.27	5.34	5.37	5.39	5.42	5.24
1977	5.48	5.62	5.65	5.70	5.73	5.81	5.79	5.79	5.85	5.89	5.92	5.87	5.76
1978	5.93	6.00	6.11	6.06	6.07	6.14	6.11	6.13	6.26	6.28			
Non-metallic mineral products - Produits minéraux non métalliques:													
unadjusted - non désaisonnalisé													
1975	5.11	5.17	5.33	5.36	5.54	5.62	5.65	5.68	5.76	5.82	5.84	5.79	5.56
1976	5.88	5.98	6.00	6.05	6.21	6.23	6.29	6.37	6.42	6.52	6.55	6.55	6.25
1977	6.55	6.60	6.66	6.75	6.91	7.05	7.06	6.99	7.00	7.06	7.01	6.98	6.89
1978	7.04	7.14	7.23	7.25	7.41	7.49	7.48	7.53	7.62	7.65			
Petroleum and coal products - Pétrole, charbon et leurs dérivés:													
unadjusted - non désaisonnalisé													
1975	6.30	6.33	6.54	6.68	6.81	6.87	6.95	7.04	7.13	7.31	7.08	7.09	6.84
1976	7.28	7.48	7.59	7.53	7.69	7.55	7.56	7.60	7.78	7.84	7.80	7.89	7.63
1977	8.04	8.39	8.33	8.68	8.58	8.54	8.53	8.55	8.90	8.97	8.76	8.90	8.60
1978	9.07	8.95	9.07	9.25	9.20	9.06	9.24	9.29	9.48	9.59			
Chemicals and chemical products - Industrie chimique et des produits connexes:													
unadjusted - non désaisonnalisé													
1975	4.95	4.96	5.00	5.12	5.21	5.20	5.34	5.25	5.25	5.35	5.45	5.50	5.22
1976	5.59	5.68	5.68	5.75	5.85	5.91	6.04	5.96	5.98	6.06	6.08	6.04	5.89
1977	6.23	6.30	6.33	6.40	6.50	6.61	6.61	6.55	6.72	6.63	6.64	6.65	6.51
1978	6.73	6.75	6.84	6.87	6.94	6.95	6.98	7.03	7.10	7.13			
Miscellaneous manufacturing industries - Manufactures diverses:													
unadjusted - non désaisonnalisé													
1975	3.77	3.81	3.87	3.89	3.95	3.99	4.00	4.00	4.07	4.07	4.15	4.18	3.98

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

A. 1957-1960

Monthly data were not published but are available on request.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67.*

B. 1961-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. Employment, Earnings and Hours, *Catalogue 72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for highways, bridges and streets; engineering; construction; highway and bridge maintenance; transportation; and transportation, communication and other utilities. *Catalogue 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

Canada: Transportation; Highway and bridge maintenance.

Atlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

Nova Scotia: Transportation, communication and other utilities; Transportation.

Quebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario and Toronto, for scientific and professional equipment; miscellaneous manufacturing industries; non-durable goods; manufacturing; wholesale trade; trade; industrial composite. *Catalogue 72-002, February 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages of Hourly-rated Wage-earners 1961-1967 for:

Canada: Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967;* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n° *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n° *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1974

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported) from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

D. 1977

January to June 1977 data were revised for Saskatchewan, Prairie Region, British Columbia, and Canada; the industries affected were Construction, Transportation, Communication and Other Utilities, and Industrial Composite. The revised data were published in the September 1977 issue of Catalogue no. 72-002.

E.1978

January to June 1978 employment, earnings and hours data were revised for all industries and geographical areas. Revised data for January to April 1978 inclusively are contained in "Employment, Earnings and Hours, January – April 1978" (Catalogue No. 72-517) and data for May and June 1978 are included in the July 1978 issue of Catalogue 72-002.

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^{O} *72-002 au catalogue, juin 1972.*

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^{O} *72-002 au catalogue, décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n^{O} 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les n^{OS} *72-201* et *72-202* au catalogue, *1957-1967.*

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1966-1968.*

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1967-1969.*

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1968-1970.*

C. 1971-1974

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins à rayons, le commerce de détail, le commerce et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue, juillet 1974.*

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre de salariés, rémunération hebdomadaire moyenne de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, transports, communication et autres services publics et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue, septembre 1974.*

Nombre d'employés, ensemble des ouvriers, ouvriers (heures déclarées), rémunération hebdomadaire moyenne des employés, ensemble des ouvriers, heures hebdomadaires— moyennes et rémunération horaire moyenne des ouvriers (heures— *déclarées)* de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72-002 au catalogue, septembre 1974.*

D. 1977

On a revisé les données de janvier à juin 1977 pour la Saskatchewan, la région des Prairies, la Colombie-Britannique et le Canada; les divisions de l'activité économique impliquées sont: la construction, les transports, communications et autres services publics et l'ensemble des industries. Ces données furent publiées dans l'examplaire de septembre 1977 du numéro 72-002 au catalogue.

E.1978

Les données sur l'emploi, les gains et la durée du travail pour le mois de janvier à juin 1978 ont été révisées pour toutes les branches d'activité et toutes les régions géographiques. Les données révisées pour janvier à avril 1978 inclusivement figurent dans *Emploi, gains et durée du travail, janvier-avril 1978* (numéro 72-517 au catalogue) et celles pour mai et juin 1978 paraissent dans le numéro de juillet 1978 du bulletin 72-002.

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Objectives

The Monthly Employment, Payrolls and Manhours survey is esigned to measure the month-to-month trends of employment, paid ours and earnings for the commercial sector of the economy with the xclusion of agriculture, fishing and trapping.

These measures are expressed in an index form for employ-ent and as weekly averages for earnings and hours paid for. The ata are compiled and published at detailed industrial and geographic vels.

ource of Data

The statistics contained in this report are based on information tained through a mail census of "larger firms".

The firm is defined as any business entity whether incorpo-ed or not; it comprises sole proprietorships, partnerships, corpora-ns and other forms of organization such as co-operatives. Most ms consist of only one "establishment" (see definition under dustrial Classification) but in some cases the firm is made up of a mber of establishments which may or may not be engaged in the ne kind of economic activity.

A firm is considered as "larger" when it employs 20 or more rsons in any one month of the year. Although the intent of the vey is to cover all such firms, it also includes some firms with less n 20 employees and excludes some firms with more than 20 ployees; the reason is that, in practice, it is not always possible to ture promptly enough employment fluctuations in individual ns.

verse

The universe for the survey is derived from a central file of ployers maintained by the Business Register and Profiling Division Statistics Canada.

erage

All commercial industries are covered by the survey, with the eption of agriculture, fishing and trapping; by definition such -commercial sectors as education and related services, health and are services, religious organizations, private households and ic administration and defense are excluded. Because the survey is ed to "larger firms", the proportion of total employment covered he survey varies among industries, provinces and urban areas. The wing table shows annual employment as reported in the survey percentage of the estimated total number of employees, the latter g estimated by adding together data from the Employment, olls and Manhours survey and data from a sample survey of ler firms plus supplementary surveys. Estimates of the total ber of employees are published in "Estimates *of Employees by ince and Industry*" (Catalogue 72-008).

CONCEPTS ET MÉTHODES

Objectifs

L'enquête mensuelle sur l'emploi, la rémunération et les heures-hommes a pour objet de mesurer d'un mois à l'autre les tendances de l'emploi, des heures rémunérées et des gains touchés dans les secteurs commerciaux de l'économie à l'exception de l'agriculture, de la pêche et du piégeage.

Ces mesures sont exprimées sous forme d'indices dans le cas de l'emploi et de moyennes hebdomadaires dans le cas des gains touchés et des heures rémunérées. Les données sont rassemblées et publiées à des niveaux de détails raffinés selon l'activité économique et le lieu géographique.

Source des données

Les statistiques présentées dans ce bulletin sont fondées sur des renseignements obtenus au moyen d'un recensement postal des "grandes entreprises".

Le terme "entreprise" désigne toute entité commerciale constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme d'organisation comme une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité économique.

Une entreprise est considérée comme une "grande entreprise" si elle emploie 20 personnes ou plus pendant un mois quelconque de l'année. Bien que l'objet de l'enquête soit d'appréhender toutes les grandes entreprises, elle vise cependant quelques entreprises employant moins de 20 salariés et n'englobe pas toutes les entreprises comptant plus de 20 salariés, car, en pratique, il est presque toujours impossible de saisir rapidement toutes les fluctuations de l'emploi dans chacune des entreprises.

Univers

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu à jour par la Division des profils et du registre des entreprises de Statistique Canada.

Champ de l'enquête

L'enquête vise tous les secteurs commerciaux de l'activité économique à l'exception de l'agriculture, de la pêche et du piégeage; en sont donc exclus les secteurs non commerciaux comme l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés et l'administration publique et la défense. Étant donné que l'enquête ne vise que les "grandes entreprises", la proportion de l'emploi total qu'elle appréhende varie d'une branche d'activité, d'une province et d'une région urbaine à l'autre. Le tableau qui suit indique l'emploi annuel relevé par l'enquête, exprimé en pourcentage du nombre estimatif total de salariés, l'estimation de ce dernier chiffre étant calculée en additionnant les données de l'enquête sur l'emploi, la rémunération et les heures-hommes avec celles d'une enquête par sondage et d'enquêtes supplémentaires menées auprès des petites entreprises. Les estimations du nombre total de salariés sont publiées dans le bulletin intitulé "Estimations *du nombre de salariés par province et par industrie*" numéro 72-008 au catalogue.

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1977 Annual Averages(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

(2) Includes health (except hospitals), recreational, business, personal and miscellaneous services only. - Comprend seulement les services récréatifs, commerciaux, personnels, d'hygiène (sauf les hôpitaux) et divers.

(3) Non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services, public administration, defence, fishing and trapping. - Ne comprend pas les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage.

(5) Non-commercial services, public administration, defence, fishing and trapping are included in total estimated employment, but are not part of the larger-firm employment survey. - Les services non commerciaux, l'administration publique, la défense, la pêche et le piégeage sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

Industrial Classification

All firms are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straight forward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The establishment, typically a factory, mine, store or a similar unit is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into reporting units which, although not capable of reporting all basic industrial statistics, can report employment and payroll data for particular locations.

Classement par activité économique

Toutes les entreprises appartiennent à une branche d'activit économique qui est déterminée en fonction de leur activité principale. S l'entreprise n'exerce qu'un seul genre d'activité économique, le classemer est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, pa exemple lorsqu'elle possède plus d'un établissement. À des fins statistique on définit l'établissement, qui consiste habituellement en une usine, un mine, un magasin ou une unité semblable, comme la plus petite unit constituant un ensemble d'exploitation distinct en mesure de déclarer tou les éléments de base de la statistique des activités économiques, qu permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou l "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour permettre d'obtenir des statistiques géographiques détaillée l'établissement est souvent subdivisé en unités déclarantes qui, bie qu'elles ne puissent fournir toutes les statistiques de base, sont en mesur de déclarer des données sur l'emploi et la rémunération pour des endroit particuliers.

The industrial classification of the statistics contained in this report is based on the Standard Industrial Classification for 1960. A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. code" columns of Tables 2, 3 and 4 correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard *Industrial Classification Manual*".

(a) Industrial composite (031-899) It is the sum of all the industries included in the survey (see Coverage).

(b) Durable goods manufacturing (durable) comprises wood products (250-259), furniture and fixtures (260-269), primary metal industries (290-298), metal fabricating industries (300-309), machinery except electrical (310-318), transportation equipment (320-329), electrical products (330-339), and non-metallic mineral products (340-359).

(c) Non-durable goods manufacturing (non-dur) consists of food and beverages (100-147), tobacco processing and products (150-153), rubber products (160-169), leather products (170-179), textile products (180-229), knitting mills (230-239), clothing (240-249), paper and allied industries (270-274), printing, publishing and allied industries (280-289), petroleum and coal products (360-369), chemicals and chemical products (370-379), and miscellaneous manufacturing industries (380-399).

(d) Building construction (404,421). It is the sum of general contractors (404) and special trade contractors (421).

(e) Engineering construction (406,409) It includes highway, bridge and street construction (406) and other construction (409).

(f) The synthetic textile industry (201) is sub-divided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

(g) Head Offices, sales and auxiliary units This special group includes head offices, sales branches and research laboratories for the following major groups of manufacturing: food and beverages (100), rubber products (160), paper and allied industries (270), primary metal industries (290), electrical products (330), and chemicals and chemical products (370).

ographic Classification

Reporting units are assigned to a province, a county (as ined by the Census of Population) and, where applicable, to an an area. Data for Newfoundland, Prince Edward Island, Nova tia and New Brunswick are aggregated in some tables to give tistics for the Atlantic Region. Similarly, data for Manitoba, katchewan and Alberta are added together to provide totals for the irie Region. The 1966 Census of Population's "Metropolitan a" definitions were used for the nineteen applicable urban areas; definitions used for other urban areas are based on a labour ket concept. The urban areas usually consist of the urban centre as l as the surrounding territory. A list showing the territory included ach tabulated urban area is available from the Employment and

Le classement des statistiques présentées ici s'inspire de la Classification type des industries de 1960. Vous trouverez une description des diverses activités économiques et divers groupes d'activité économique dans le "Manuel *de la classification type des industries,*" no 12-501 au catalogue.

a) Ensemble des industries (031-899) - L'ensemble des activités économiques visées par l'enquête. (Voir champ de l'enquête)

b) Manufactures, biens durables (durable) - L'ensemble de l'industrie des produits du bois (250-259), de l'industrie des meubles et accessoires d'ameublement (260-269), de l'industrie des métaux (formes primaires) (290-298), de l'industrie des produits métalliques (300-309), de l'industrie de la machinerie (sauf le matériel électrique) (310-318), de l'industrie du matériel de transport (320-329), de l'industrie des appareils et du matériel électriques (330-339), et de l'industrie des produits minéraux non métalliques (340-359).

c) Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (100-147), de l'industrie du traitement et des produits du tabac (150-153), de l'industrie des produits du caoutchouc (160-169), de l'industrie des produits du cuir (170-179), de l'industrie des produits du textile (180-229), de l'industrie de la bonneterie (230-239), de l'industrie du vêtement (240-249), de l'industrie du papier et des produits connexes (270-274), de l'imprimerie, de l'édition et des industries connexes (280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (360-369), de l'industrie chimique et des produits connexes (370-379), et des industries manufacturières diverses (380-399).

d) Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (404) et des entrepreneurs spécialisés (421).

e) Génie civil (406,409) - L'ensemble de la construction de routes, ponts et rues (406) et des autres constructions (409).

f) L'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

g) Sièges sociaux, bureaux de vente et services auxiliaires. Ce groupe spécial comprend les sièges sociaux, les bureaux de ventes, les succursales et les laboratoires de recherche des entreprises faisant partie des groupes d'activité économique suivants: industries des aliments et boissons (100), industrie du caoutchouc (160), industrie du papier et des produits connexes (270), industrie des métaux (formes primaires) (290), industrie des appareils et du matériel électriques (330) et industrie chimique et des produits connexes (370).

Classement géographique

On attribue les unités déclarantes à une province, un comté (selon la définition utilisée aux fins du recensement de la population) et, s'il y a lieu, à une région urbaine. Les données se rapportant à Terre-Neuve, à l'Île-du-Prince-Édouard, à la Nouvelle-Écosse et au Nouveau-Brunswick sont regroupées dans certains tableaux pour présenter l'ensemble des statistiques de la région de l'Atlantique. De la même façon, les données relatives au Manitoba, à la Saskatchewan et à l'Alberta sont additionnées pour indiquer les totaux de la région des Prairies. La définition du terme "région métropolitaine" utilisée aux fins du recensement de la population de 1966 a été retenue pour les dix-neuf régions urbaines; les définitions utilisées pour les autres régions urbaines sont fondées sur un concept du marché du travail. Une région urbaine se compose habituellement d'un

Payrolls Section. The reporting units not located in a tabulated urban area or not allocated to a compiled county, are included in provincial, regional and national totals.

Definitions

1. **Reference Period**

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are permitted to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period. If, owing to strikes, holidays or other similar factors, the data for the reported period are not representative of the reference period, adjustments are made to accurately reflect the situation of the last seven days of the month.

2. **Employee**

All persons drawing pay for services rendered or for paid absence during the survey reference period and for whom an employer makes CPP or QPP and/or UIC contributions constitute employees.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment), and casual employees (those who are hired for discontinuous periods or on an irregular basis and who worked at least seven hours during the reference period).

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensionners, home workers, members of elected or appointed bodies, military personnel and persons providing services to an establishment on a contract basis.

An employee working for a part of the reference period and unemployed or on strike for the rest is counted as employed. Persons not receiving pay for the entire reference period are excluded.

The employees are classified into two broad occupational categories, namely: salaried employees and wage-earners:

(a) **Wage-earners**

This group includes employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. All the above-mentioned employees are considered to be wage-earners regardless of whether their earnings are based on monthly, hourly or other rates of pay. Average weekly wages are computed for all wage-earners but average weekly hours and average hourly earnings are calculated only for wage-earners for whom hours data are available.

centre urbain et du territoire qui l'entoure. Vous pouvez vous procurer une liste indiquant le territoire compris dans chaque région urbaine figurant dans les tableaux en vous adressant à la Section des statistiques de l'emploi et de la rémunération. Les chiffres des unités déclarantes situées ailleurs qu'dans une région urbaine indiquée dans les tableaux ou non attribuées à un comté dont le nom figure sur la liste font partie des totaux provinciaux, régionaux et nationaux.

Définitions

1. **Période de référence**

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. En pratique, étant donné que peu d'entreprises tiennent des registres de paye pour cette période précise, on leur permet de faire porter leur déclaration sur la (les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en effectuant le calcul suivant: on divise le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration. Si, en raison d'une grève, d'un jour férié ou d'autres facteurs semblables, les données déclarées ne sont pas représentatives de la période de référence, on procède aux rajustements qui s'imposent afin de traduire fidèlement la situation pendant les sept derniers jours du mois.

2. **Salarié**

Toute personne qui est rétribuée pour ses services ou ses absences pendant la semaine de référence et pour laquelle l'employeur verse des contributions au R.P.C. ou au R.R.Q. et à la caisse d'assurance-chômage, est un salarié.

La catégorie "salariés" comprend les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels (ceux qui sont embauchés de façon temporaire ou irrégulière et qui ont travaillé au moins sept heures au cours de la période de référence).

Le concept des salariés exclut les propriétaires et les partenaires d'entreprises non constituées en corporation et ceux qui possèdent un bureau pour l'exercice d'une profession, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres de corps élus ou nommés, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire.

Sont visées les personnes qui ont travaillé pendant une partie de la période de référence mais qui étaient en chômage ou en grève pendant le reste de la période. Les personnes n'ayant pas touché de paye pour la période de référence entière ne sont pas visées.

Les salariés sont classés en deux catégories professionnelles, soit les employés et les ouvriers:

a) **Ouvriers**

Cette catégorie comprend les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses, les contremaîtres remplissant des fonctions analogues à celles des ouvriers dont ils ont la charge, etc. Toutes ces personnes sont considérées comme des ouvriers, que leurs gains soient fondés sur des taux de rémunération mensuels, horaires ou autres. Les salaires hebdomadaires moyens sont calculés pour tous les ouvriers, mais les heures hebdomadaires moyennes et les gains horaires moyens sont calculés uniquement pour ceux dont on connaît le nombre d'heures de travail.

(b) **Salaried Employees**

This category comprises executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained these data combined under "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in the present publication. The system now provides separate earnings data for all wage-earners and salaried employees whereas formerly only "Average Weekly Wages" for hourly-rated wage-earners were available.

Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as be eavement leave, jury duty, etc.

Standard Work Week

The standard work week is the number of hours or days of work normally scheduled for the majority of full-time employees.

hodology

The data appearing in this report were collected by means of tionnaires mailed monthly to all firms which employ 20 or more ons in any one month of the year. In order to improve the quality ata, the response rate is increased through two reminders mailed ll non-respondents one month and two months after the original -out. If the two reminders do not produce a response, the Field sion of Statistics Canada attempts to obtain the required data by hone or in a personal interview. These steps result in a final onse rate of over 80%. Firms for which no response is obtained are accounted for in the employment, earnings and hours tables of publication. To do this, the unknown figures are replaced by es based on the behaviour of the reporting unit in the previous th and on the behaviour of reporting units which are similar with

b) **Employés**

Cette catégorie comprend les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

3. **Gains**

Les gains des ouvriers et des employés représentent la rémunération brute de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les traitements, les salaires au taux ordinaire, les gains provenant du travail à la pièce et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de référence. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "gains" désigne l'ensemble des salaires hebdomadaires des ouvriers et des traitements des employés. Les publications antérieures à mars 1971 présentaient les données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "gains hebdomadaires moyens" des salariés pris en compte ici. Ce système permet maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "salaires hebdomadaires moyens" des ouvriers rémunérés à l'heure.

4. **Absence payée**

Les absences payées comprennent les jours fériés payés, les vacances, les congés de maladie, ainsi que les congés d'accident du travail et les congés personnels tels que les congés de deuil et les congés pour fonctions de jury.

5. **Semaine normale de travail**

La semaine normale de travail est le nombre d'heures ou de jours de travail normalement prévus pour la majorité des salariés à temps plein.

Méthodologie

Les données présentées dans cette publication ont été receuillies au moyen de questionnaires postaux envoyés chaque mois à toutes les entreprises employant 20 personnes ou plus au cours d'un mois donné de l'année. Afin d'améliorer la qualité des données, on accroît le taux de réponse en faisant parvenir deux lettres de rappel à toutes les entreprises non répondantes un mois et deux mois après l'envoi du questionnaire. Si elles ne répondent toujours pas après avoir reçu les deux avis, la Division des opérations régionales de Statistique Canada tente d'obtenir les données nécessaires par téléphone ou au moyen d'une interview sur place. Ces mesures permettent généralement de hausser le taux de réponse à plus de 80%. Les entreprises qui ne répondent pas à l'enquête sont quand même prises en compte dans les tableaux de la publication portant sur l'emploi, les gains et les heures de travail. Pour ce faire, on remplace les chiffres

respect to industrial classification, size and geographic location and which have responded for the month in question.

1. Data Edit

All the completed questionnaires which reach Statistics Canada are carefully edited for completeness, consistency and accuracy both manually and using computer edit procedures. To perform the computerized edit, the responses are assembled into imputation groups which are formed on the basis of industrial classification, geographic area and size of the reporting unit. The composition of these groups is such that they consist of reporting units which behave similarly with respect to the characteristics being measured and with respect to relationships between these characteristics. This edit compares the value of a characteristic (number of employees, hours worked, salary per employee, the ratio of the present number of employees to last month's number of employees, etc.) to the corresponding value of the characteristic for the whole imputation group. The amount by which a characteristic is allowed to vary from the average imputation group value is calculated separately for each group and for each characteristic and depends on the homogeneity and stability of the group itself.

When a figure varies too much from the average value for the imputation group, it is replaced by a value which is at the maximum variance allowed by the computer edit. It is not always possible to find a value within the allowable limit of the computer edit; in such case, the figure is replaced by an imputed value.

This procedure may, in rare occasions, result in changing a figure which was actually correct. This is a small penalty to be paid for a mechanical procedure which detects efficiently many significant errors such as misplaced decimal points, mistakes in recording of data and problems due to misunderstanding of definitions or instructions.

2. Imputation

Every month, there are reporting units for which response or a partial response is received and units whose reports fail edits but cannot be corrected by automatic procedures. Some or all the data for those units are imputed. This means that the incorrect or unknown characteristics are replaced by values derived from the other characteristics in the report, from the firm's report of the previous month and from the behaviour of the imputation group to which the firm belongs.

Imputation is used on about 4% of the reports each month. As in the case of automatic error correction, it is possible for a value which is actually correct to be replaced by another value. However, it is more often that an erroneous or non-existant figure is replaced by a figure which is closer to the true value and which is based on the firm's report from the previous month and on the reports of firms in a similar industry, size range and geographic location.

Reliability of the Estimates

Because the Monthly Employment, Payrolls and Manhours survey is a census, any inaccuracy in the results is due to non-sampling error. Some of the factors contributing to non-sampling error are the inability to obtain responses from all in-scope reporting units, incorrect responses supplied by respondents and mistakes in recording,

inconnus par des données qui s'inspirent de celles que l'unité déclarante a fournies le mois précédent et de celles fournies par les unités déclarantes qui ressemblent à l'entreprise non répondante sur le plan du classement par activité économique, la taille et le lieu géographique, et qui ont répondu pour le mois observé.

1. Vérification des données

Tous les questionnaires remplis renvoyés à Statistique Canada sont soigneusement vérifiés à la main et par ordinateur pour assurer qu'ils sont complets, cohérents et exacts. Pour être vérifiées par ordinateur, les réponses sont réparties en groupes d'imputation constitués en fonction du classement par activité économique, du lieu géographique et de la taille de l'unité déclarante. La composition de ces groupes est telle qu'ils regroupent des unités déclarantes qui présentent les mêmes caractéristiques et dont les caractéristiques affichent les mêmes liens entre elles. Cette vérification permet de comparer la valeur d'une caractéristique (nombre de salariés, heures de travail, gains par salarié, rapport du nombre actuel de salariés à celui du mois précédent, etc.) par rapport à la valeur de la caractéristique correspondante pour tout le groupe d'imputation. L'écart qui peut séparer la valeur d'une caractéristique et la valeur moyenne de la même caractéristique pour le groupe d'imputation tout entier est calculé séparément pour chaque groupe et pour chaque caractéristique, et dépend de l'homogénéité et de la stabilité du groupe lui-même.

Lorsqu'un chiffre s'écarte trop de la valeur moyenne pour tout le groupe d'imputation, on le remplace par une valeur qui comporte la variance maximum permise par la vérification par ordinateur. Il n'est pas toujours possible de trouver une valeur qui se situe à l'intérieur de la limite permise par l'ordinateur; si tel est le cas, on remplace le chiffre par une valeur imputée.

Il arrive, en de rares occasions, que ce procédé se solde par la modification indue d'un chiffre qui était exact au départ. Cela n'est pas trop grave si l'on considère que ce procédé mécanique permet de déceler efficacement un grand nombre d'erreurs graves comme des points décimaux mal placés, des erreurs d'inscription des données et des problèmes attribuables à une mauvaise interprétation des définitions ou des instructions.

2. Imputation

Chaque mois, on reçoit une réponse complète ou partielle de certaines unités déclarantes, alors que d'autres renvoient des questionnaires qui sont rejetés à la vérification et qui ne peuvent être corrigés à la machine. Une partie ou la totalité des données pour ces unités doivent donc être imputées. Cela signifie que les caractéristiques incorrectes ou inconnues sont remplacées par des valeurs calculées en fonction d'autres caractéristiques de la même déclaration de l'entreprise, de sa déclaration du mois précédent et des caractéristiques du groupe d'imputation auquel elle appartient.

On effectue une imputation pour environ 4% des déclarations chaque mois. Comme dans le cas de la correction automatique des erreurs, il est possible qu'une valeur exacte au départ soit remplacée par une autre. Toutefois, il arrive plus souvent qu'un chiffre erroné ou non existant soit remplacé par un chiffre plus proche de la valeur réelle et fondé sur la déclaration de l'entreprise du mois précédent et sur celles d'entreprises qui font partie d'une branche d'activité semblable, appartiennent au même groupe de taille et sont situées dans le même lieu géographique.

Fiabilité des estimations

L'enquête sur l'emploi, la rémunération et les heures-hommes étant une enquête exhaustive, toute inexactitude dans les résultats est attribuable à une erreur d'observation. Parmi les exemples de sources d'erreurs d'observation, citons l'impossibilité d'obtenir des renseignements de toutes les unités de l'échantillon, les renseignements inexacts fournis par les

oding and processing of the data. Non-sampling errors are difficult o measure and no estimates of this type of error have been obtained or this survey as yet. However, non-sampling errors have been kept o a minimum by the use of a carefully designed and carefully worded uestionnaire, the relative simplicity of the data requested, follow-up f non-respondents, thorough editing of data and control of the rocessing operations.

tatistical Presentation

Data Revision

Each month, statistics for three latest months are prepared by the Employment and Payrolls Section. Data for the first, most current month, are entitled first estimates. They are based on a limited number of returns (usally about 55%) and only highly aggregated figures are released in the Statistics Canada *Daily* and the First Estimates table of this publication. Simultaneously, second estimates are prepared for the month immediately preceding the most current data and third estimates for the month prior to that. Both of these latter estimates are of course, of higher quality than that of the first estimates because of the higher rate of returns (approximately 75% and 82% respectively). Consequently, full details for both of these months are shown in this publication.

After completion of the third estimate, revisions to the data are made occasionally to incorporate larger corrections originating from late returns and corrected information received from respondents or to rectify mechanical errors. These corrections appear in the tables of this publication.

Index Numbers

Index numbers are calculated by dividing the current month's employment (or payroll) by the monthly - average of the total base year employment (or payroll).

The index numbers constitute a better measure of the monthly trends in statistical series than the actual values because they are not effected by certain statistical changes. For example, a large firm erroneously missing from the survey can be introduced by adjusting both the current and base year data and, thus, will not distort the monthly changes indicated by the index numbers. However, the measure of the monthly trend calculated from the actual value will be biased because the additions which should be reflected in all months are only included from the time the correction is made.

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages of hourly-rated wage-earners by their total weekly hours. Both of these averages apply only to the subset of wage-earners for whom hourly details are reported. It should be noted that total hours include overtime hours actually worked and that the wage-earners total includes part-time wage-earners and casuals working more than seven hours during the survey reference week.

entreprises répondantes et les erreurs d'inscription, de codage et de traitement des données. Les erreurs d'observation sont difficilement quantifiables et l'on n'a pas encore établi d'estimations de ce genre d'erreur pour cette enquête. Toutefois, on a fait des efforts pour les réduire grâce à la conception et à la formulation soignées des questionnaires, la simplicité relative des données demandées, la relance des entreprises non répondantes, la vérification approfondie des données et le contrôle rigoureux des opérations de traitement.

Présentation statistique

1. **Révision des données**

Chaque mois, la Section des statistiques de l'emploi et de la rémunération prépare des statistiques pour les trois derniers mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (habituellement environ 55%) et seuls des chiffres très généraux sont publiés dans le *Quotidien* de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes pour le mois qui précède celui-là. Bien entendu, ces deux dernières estimations sont de meilleure qualité que les premières en raison de l'obtention d'un plus grand nombre de réponses (environ 75% pour les deuxièmes estimations et 82% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on modifié à l'occasion les données à la lumière de révisions plus importantes effectuées pour tenir compte des déclarations des retardataires et des rectifications reçues des entreprises enquêtées, ou par suite de la correction de certaines erreurs mécaniques. Les modifications apportées figurent dans les tableaux de la présente publication.

2. **Nombres-indices**

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base.

Les nombres-indices constituent une mesure plus valable des tendances mensuelles observées dans les séries statistiques que les valeurs réelles, car ils ne sont pas touchés par certaines variations statistiques. Par exemple, on peut introduire dans l'enquête une grande entreprise qu'on a oublié de dénombrer lors du listage en rajustant à la fois les données de l'année courante et celles de l'année de base et, ainsi, éviter de fausser les variations mensuelles affichées par les nombres-indices. Toutefois, toute mesure de la tendance mensuelle calculée à partir de la valeur réelle comportera un biais, car les ajouts qui devraient être faits pour tous les mois ne sont effectués qu'à partir du moment où la correction est apportée.

3. **Moyennes**

On calcule les heures hebdomadaires moyennes en divisant le nombre hebdomadaire total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les gains horaires moyens en divisant le salaire hebdomadaire total des ouvriers rémunérés à l'heure par le nombre total d'heures de travail qu'ils ont fait par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. Il convient de remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le nombre total d'ouvriers comprend les ouvriers à temps partiel et occasionnels qui ont travaillé plus de sept heures pendant la semaine de référence.

4. Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods. It should be noted that the seasonally-adjusted series contains irregular as well as long-term cyclical fluctuations.

The X-11 variant of the U.S. *Census Method II* is used to seasonally adjust the data. This seasonal adjustment system is a complex computer program which differentiates between the seasonal trend and the irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis the entire historical series of seasonally-adjusted data is revised in light of the most recent information on changes in seasonality.

This system is used to calculate the seasonally-adjusted employment index numbers, and the average weekly hours and average hourly earnings for selected statistical series. Additional seasonally-adjusted series may be found in "Employment, *earnings and hours, seasonally-adjusted series, January 1961 – December 1971*" (Catalogue 72-206).

5. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

4. Désaisonnalisation

Les fluctuations des séries chronologiques économiques sont causées par des mouvements saisonniers, cycliques et irréguliers. Une série désaisonnalisée est une série dont on a éliminé les effets des mouvements saisonniers. Les mouvements saisonniers sont ceux qui sont causés par des événements annuels réguliers comme les changements de température, les cycles agricoles, les jours fériés et les vacances. Il convient de noter que la série désaisonnalisée contient des fluctuations irrégulières ainsi que des fluctuations cycliques à long terme.

La variante X-11 de la *Method II* de désaisonnalisation du *U.S. Bureau of the Census* est utilisée pour désaisonnaliser. Ce système permet de déceler les mouvements saisonniers, tendanciels et irréguliers au cours d'une période de plusieurs années et, à la lumière des mouvements passés, d'estimer les coefficients saisonniers appropriés pour l'année en cours. Sur une base annuelle, toute la série chronologique des données désaisonnalisées est révisée à la lumière des renseignements les plus récents sur les changements de saisonnalité.

Ce système est utilisé pour calculer les nombres-indices désaisonnalisés de l'emploi, ainsi que les heures hebdomadaires moyennes et les gains horaires moyens pour certaines séries statistiques. Vous trouverez d'autres séries désaisonnalisées dans le bulletin *Emploi, rémunération et heures, séries désaisonnalisées, janvier 1961 – décembre 1971*, numéro 72-206 au catalogue.

5. Confidentialité

Les données présentées ici ont été examinées afin d'assurer que la confidentialité des réponses des entreprises soit respectée.
